✔ Open, accessible API.

## Save

Cost & Increase ROI

✔ Zero-tiered dynamic auto-addition of licenses.

✔ Pay-as-you-go pricing and Usage-based billing.

✔ No multi-year lock-ins. Opt-out anytime.

Why Backup

Dropbox

SaaS *Data Loss* is Prevalent and Damaging

81% of companies lost SaaS data

only

15% could recover it without third-party backup

Why Backup

Dropbox

Dropbox Does Not Offer Point-in-time Recovery

Deleted files are marked for deletion in our system and are purged from our storage servers. They can no longer be recovered.

Dropbox

Backup Means No More Data Loss

Backup SaaS data or risk losing customers, partners, and employees.

Gartner

Backups are critical in ransomware recovery and response, if you are infected, a backup may be the best way to recover your critical data.

CISA

Regulations Mandate Backup

The controller should have the ability to restore the availability and access to personal data in a timely manner in the event of a physical or technical incident.

GDPR

CAUTION
Data cannot be restored without backup

It's Your Responsibility!

The SaaS Shared Responsibility Model puts the onus of the data protection, backup, and recovery of your customer's data on you

Recover from Ransomware and Data Loss

Mitigate the risk of ransomware and reduce the cost of downtime with quick data recovery. Encrypted and immutable SaaS backup with unlimited retention lowers your Recovery Time Objective and ensures seamless business continuity.

Native Workarounds are Time-bound and Cumbersome

Native workarounds like Trash and Recycle Bins are archival and not built for data recovery. Restoring data is tedious and after the time limit, data is permanently deleted.
