Secure Backup | Smart Recovery

SALESFORCE *BACKUP* & *RECOVERY* SOLUTION

Trusted by 16K+ Customers

RECOVERY AND EXPORT: Unlimited and Flexible Data Recovery

→ Unlimited Point-in-time Restore with historical snapshots/versions

→ Granular, object-level restore of metadata by type

→ Granular restore of data by record

→ Cross-org and Production-to-Sandbox Restore

→ Salesforce Data Anomaly Detection and notification about activity red flags that could indicate problems such as potential data loss or atypical changes

→ Sandbox Seeding with Data Anonymization: Test applications or processes by replicating all or a part of production data and metadata. Saves time, effort, and eases testing. Seeding includes 1-click customizable data anonymization.

→ Compare data/metadata across backups and/or production data: Display only changed data, to pin-point the exact data that was altered

→ Advanced search capabilities for real-world scenarios such as by RecordID, metadata object types, and last modified user

SECURITY: Stringent and Audit-ready Credentials

→ Secure Amazon S3 data storage for high availability during Box downtime

→ ISO 27001, HIPAA, and GDPR compliant

→ OAuth, OpenID, MFA/2FA, Okta support

→ Choice of global AWS data centers in Australia, Canada, France, Germany, Ireland, Japan, U.K., and the U.S.

→ AES-256 data encryption at rest and HTTPS in-transit

→ Sandbox seeding with 1-click data anonymization to secure PII data and comply with regulations.

→ Immutable Storage-Object-Lock (optional) for ransomware recovery

→ 7-day recovery grace period for deleted backups

→ 99.9% Uptime / Availability SLA

→ Fine-grained Access Control with IP Restrictions
