# 1 Preface

# 1.1 About this Guide

Thank you for selecting our backup service for Microsoft 365. Relax! All your Microsoft 365 data is now securely protected with easy recovery from data loss. Our backup service comprehensively backs up your Microsoft 365 Exchange, OneDrive, SharePoint, OneNote, Teams & Groups data on industry-leading AWS S3 storage. Our product's ethos is to provide feature-rich backup and recovery with security, ease of use, and flexibility woven in.

Our backup service is cloud-native, a full cloud-to-cloud solution. No installation is required, the setup is hassle-free, backup is easy, and there are flexible recovery and export options. Read on for instructions about how to activate and manage your backups, restore your data by keyword, from any point-in-time, and at any granular/hierarchical level, export your backups to your own storage, activate summary/exception reporting, and set up MFA and other helpful features.

# 1.2 Audience

This guide is intended for individuals who administer our backup service for Microsoft 365.

# 1.3 What's in this Guide

This guide is organized to help you find the information you need to manage our backup service for Microsoft 365. It is divided into functional parts intended to support you as you manage your environment:

- Creating and Accessing Your Backup Account
- Backing Up Your MS 365 Data
- <u>Recovering Your Backed Up Data</u>
- <u>Compliance</u>
- Filtering and Viewing Drill-Down Details
- Managing Your Account
- Managing Subscriptions and Payments

# 2 Creating and Accessing Your Backup Account

# 2.1 Prerequisites

To administer the backup for the Microsoft 365 environment, the following is required:

- Microsoft license
- Global Administrator account in Microsoft Office online version

# 2.2 Sign Up/Sign In from Our Backup Service Home Page

- 1. In your Internet browser, open our backup service's website and click Login.
- 2. Click **Customers**. The Sign In page is displayed.

SaaS Data Protection Platform			Tee Ind
	Sign In to yo Durit have an acr		
	fmail:

	G Sign up with Google
	Sign up with Microsoft
	By creating an account, you agree to our <u>Terms of Use</u> and <u>Privacy Policy</u> . Wirll occasionally send you account related emails.
	powered by aws

- 4. Complete the form, and then click Sign up. You can log in using a username and password, or with your Microsoft credentials.
  - Note: Our backup service gives you the choice of numerous AWS data centers available in the dropdown menu "Location." These include locations in Australia, Canada, EU (France, Germany, and Ireland), US, UK, South Africa, India, and Japan. The ability to choose from a wide range of data centers helps our customers comply with local data sovereignty laws that regulate the physical location and movement of data. In addition, we also offer a "Bring Your Own Storage" (BYOS) option on request. This allows you to backup sensitive data in your own AWS S3 buckets, S3 compatible storage service, Azure, or Google Cloud Platform. Please contact our support team for more information.
- 5. Your trial account is created, and an email containing your activation link is sent to your email address. Click on the activation link contained in the email you received to activate your account. If you sign up with Google, Azure, or Okta, the activation link will not be sent to you.
- 6. Once your account is activated, you are redirected to the backup service *login* page. Enter your email address/password and click **Sign In** to login and access your account.

7. After you log in, you will see the following screen, enabling you to begin creating your backup tasks:

# 2.3 Resetting Your Password

If you do not remember your password, you can easily reset it using the **Password Reset** function.

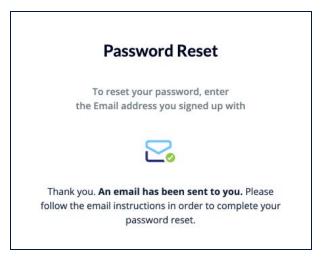

1. On the sign-in page, click **Forgot your password?** to start the process of resetting your password.

	Sign In to your Account

- 3. In the Email field, enter the email address that you used to sign up.
- 4. Click **Reset**, and the *Password Reset* window will appear.

5. In the email, click **Reset** Backup Service **Password** to confirm the password reset, and the *Change Your Password* window will appear.

Fill-in the new passwo	rd
New Password	Ø
Confirm New Password	Ø
Save	

6. Enter your new password in the **New Password** field and again in the **Confirm New Password** field, and click **Save**.

After resetting the password, you will be directed back to the *Sign In to your Account*.

# 3 Backing Up Your Microsoft 365 Data

Microsoft 365 lacks the daily backup and archiving process necessary for you to restore data after it has been manually or automatically removed from the recycle bin. Our backup service's automated daily backup of your Microsoft 365 data ensures that you can both quickly recover data from any point in time as well as export your archives for local storage.

Our backup service's Microsoft 365 service backs up data from:

Mail, Calendar, Contacts, Tasks and Notes (Microsoft Exchange)

**Note:** Our backup service does not back up Exchange Online Archive by default. If you would like your Online Archive to be backed up, contact Support.

- Conversations, Sites, Calendars and Channels (Microsoft Teams and Groups)
- All of your sites, files, and libraries (Microsoft OneDrive and Microsoft SharePoint)

With a few simple clicks, you can activate backups for all or selected users.

# 3.1 Microsoft 365 Exchange

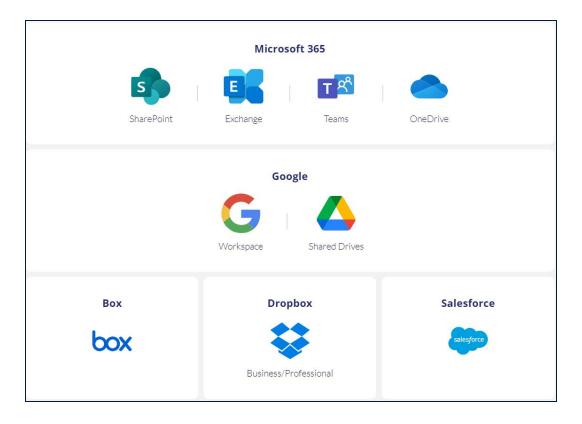

#### 3.1.1 Creating a New Backup Task

#### To create a new backup task:

- 1. Sign in to your account, or if you are already signed in, click the **Homepage** option in the Navigation Panel.
- 2. On the Homepage, click + Add Backup Task.

									-
12	C Shirth /								80

The following page is displayed:

3. Click the name of the service you would like to back up, in this case: Microsoft Exchange.

Enter your admin details	
* Backup Name	
Use OAuth based authorization	Use credential based authorization
Please note that our authorization process uses OAu	Backup Name Enter your backup name
Cancel	Authenticate

- 1. Fill in the name of the backup task. This name is used in the notifications and reports, and it can be changed later.
- 2. You will see the OAuth based authorization Click Authenticate to start the process of granting the access token. You will be redirected to the Microsoft sign-in page. Enter Global Admin credentials to sign in to your Microsoft account.

#### **IMPORTANT!**

The user that you enter **must** have Global Admin permissions.

"Use credential-based authorization" is not active by default, and we Note: don't recommend it. If you would like to use this, contact our support team.

#### 3.1.2 Configuring a Backup Task: Microsoft Exchange

This set of options enables you to select the backup settings for the account, team or site. Click the gear-shaped settings icon.

Test Bockup 🖉 1 Homepage > Test Backup			
			0
Backup Settings The automatic addition/deletion of an account, site, domain, table or drive can affect your monthly or	annual billing amount		
☑ Index all data for Search ●	Backup Datacenter	Retention Period	0

Automatically activate new mailboxes	- <u> </u>		
Bulk Activation and Management			
(+) Create a new Activation Rule			

- 1. You can change the name of the backup task by clicking the pencil icon.
- 2. The Connected / Disconnected icon indicates whether the application was able to connect to the specified Microsoft 365 account. If the authentication token granted for the application becomes invalid (e.g., it expires due to inactivity because you put the backup task on pause for a long time), the Connected icon changes to the Disconnected icon. To grant the application a new token, click on the icon to open the authentication dialog, and repeat the authentication process.
- 3. By default, the **Index all data for Search** option is selected, which enables our backup service to provide you with its granular search and restore functionality. In the process, your data is temporarily decrypted for a brief period of time, and then re-encrypted once the index is built. If this goes against your company policy and you would like to disable automatic indexing, please contact our support team.
- 4. In the Microsoft Exchange system, accounts can have a Microsoft "Unlicensed" status (not to be confused with "Unlicensed Backup Service product"). These can be the external accounts invited by users with an active license, accounts automatically generated for shared file storage, etc. Check the Backup Task page to see which accounts are MS licensed and unlicensed.

**Note:** "Unlicensed" accounts have limited permissions, and we don't advise using "Unlicensed" administrator accounts.

- 5. Backups are automatically archived when an entire account is deleted. The **Retain auto-archived backups** option allows you to retain them for a specified number of days, after which they will be automatically deleted. Otherwise, the backups will be retained indefinitely.
- 6. The **Automatically activate new mailboxes** option instructs the system to detect new mailboxes, and begin backing them up automatically.
- 7. Create a new activation rule see explanation below.

**Note:** The **Backup Datacenter** and **Retention Period** fields are "display only," and their values can't be changed here.

- 8. The **Backup Datacenter** field displays the Datacenter location you selected when you signed up with your registration.
- 9. The **Retention Period** field displays whether a retention period has been set up. By default, we provide unlimited retention of your daily backups for as long as you maintain your account subscription. You can override this default and

specify a retention period in days, months, or years by submitting a support ticket. Backups older than the retention period specified will be automatically deleted.

**Note:** Your backup storage data center cannot be changed once it's been set during the account setup process. Contact our support team if you need to move backups to a different geographic region, or if you'd like more information on our "Bring Your Own Storage" (BYOS) option.

#### 10. Backup Frequency and Backup Hour

- a. Click the drop-down list of the **Backup Frequency** field and select how often you would like the backups to occur. The available options include:
  - i. Daily
  - ii. Every 3 Days
  - iii. Weekly
  - iv. 3 times a day
- b. Click the drop-down list of the **Backup Hour (UTC)** field and select the backup hour. Click **Save**.
- **Note:** 3x daily backups might be subject to additional charges. Please contact our support team or your sales representative if you have any questions before changing the backup frequency.

#### 3.1.3 Activating Your Backups

Once you have configured your backup settings, you need to **Activate** them, in order for them to begin backing up your data.

1. Navigate to the list of account, team or sites following the Backup Settings section.

#### Microsoft 365 Backup and Restore User Guide Backing Up Your Microsoft 365 Data

**Note:** The screens below are from Microsoft 365 Exchange, but the functionality is identical for all of the Microsoft 365 applications.

#### 3.1.4 Bulk Activation and Management

Want to save time and effort when setting up large numbers of Microsoft 365 backups?

Our backup service's Bulk Activation feature enables you to activate the backups of all members of Microsoft Groups with a single click. When users are added or removed from the group, their backups will respond accordingly.

To create a new Activation Rule, from the *Backup Settings* screen, click **+Run Bulk** Activation.

← Back	Cancel Perform on	e-time activation Create an activation rule	

You have the option of a **one-time activation**, which will only run once, or **Create an activation rule**, which will run automatically. It checks daily to see changes to each group, and will back up mailboxes that are added to groups.

You can also configure a deactivation rule. There are three options: maintaining the current status, pausing backups or deleting backups.

Bulk Activation and Management	0
Run Bulk activation	
Microsoft Groups 🕕 Marketing Team	Microsoft Groups      All Company
Deactivation rule for mailboxes r	removed from groups Maintain current status $\sim$
	Pause
	Delete
	Maintain current status

#### 3.1.4.3 Import a List of Accounts

If you choose to **Import a List of Accounts**, you will be prompted to upload a CSV file with a single column titled "Account Email."

Bulk Activation and Management Upload File With List Of Accounts	• 0 •
Drag & drop file or click in this area CSV file with one column - email address, see <b>Sample</b>	

#### 3.1.5 Backing Up a Public Folder

In order to back up a Public Folder, the Admin account must have a mail Microsoft 365 Exchange license and needs to have read/write permissions for the Public Folder.

#### To back up a Public Folder:

- 1. From the Exchange Admin Center, click Public Folders.
- 2. Select the Public Folder that you want to back up and click '...' to select Root Permissions.
- 3. Verify that the Admin account used for the backup service backups has read/write access to the Public Folder. If not, click '+' to add the Admin account.

Public Folders data will be available for recovery under the PublicFoldersAccount record, listed among other backed up Exchange users.

The restore process for a Public Folder creates a sub-folder. Add the generated restore folder as a new Public Folder in order to allow access to the restored data.

Follow the normal Microsoft 365 Exchange Online procedures to create a public folder, using the backup service restored sub-folder as the path, as well as any additional sub-folders that are included in the restore.

#### 3.1.6 Usage Reports

In order to provide greater clarity about what our backup service is backing up, you can export a CSV file that lists all of the entities - mailboxes, teams and sites - that were backed up, including the status of each entity (active, inactive, or archived). And for Microsoft Exchange mailboxes, the file will list whether each one is licensed or unlicensed. To export a usage report, click the **Export** button. The report will be sent to the user via email.

## 3.2 Securing Your Backups

By default, all primary and secondary users can preview, browse, and recover any backed up data. This could be a security risk if sensitive information is contained in the backup snapshots.

Primary users can limit access to one or more sites, drives, accounts, or users so that only they will be able to see, restore and export this data.

- 1. Primary user: From the *Homepage*, click the name of the service whose data you would like to restrict.
- 2. Click one or more account, team or sites.
- 3. Click Tags, and check the Limited Access tag.

From here, it is possible to modify the fields described in <u>"Configuring a Backup</u> Task: Microsoft Exchange."

#### 3.2.2 Removing a Backup

You can delete individual user backups or the entire backup service from your account if you do not want to use them further. The following sections guide you through the process of removing backup services and individual user backups.

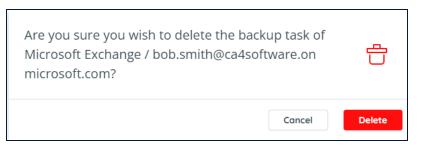

#### 3.2.2.1 Removing an Entire Backup Service

To remove an entire backup service, click the **Delete Backup** icon of the backup service you want to remove.

#### Microsoft 365 Exchange

- 06	Full MS Exchange Bockup // Microsoft Exchange Successfed	Total Ø Active Ø Total Size Last Snapshot Next Backup I 12 12 1481 MB 14 days app In 18 hours € Back results Backup C
× 83	Groups/Teams Backup // Microsoft Groups / Teams Succeeded	Total Ø Active Ø Total Size 8 0 0 MB Never In 19 hours O Delete Backup (n Pause Backup (n Pause Backup (n Pause Backup (n Pause Backup

The Confirm Delete pop-up window is displayed with a warning message.

Click **Delete**. The selected backup service is removed from your account.

To prevent mistaken deletions, there is a grace period of 7 days, during which your data is still maintained and you can cancel the operation.

#### 3.2.2.2 Removing an Individual Account, Team or Site

- 1. Click the backup service from which you want to remove the account, team or site. The backup task settings page is displayed.
- 2. Add a check next to the item that you want to remove. Click **Delete** in the **Actions** menu.

	Google	
вох	Dropbox Business/Professional	Salesforce

4. Click OneDrive.

- 5. Fill in the name of the backup task. This name is used in the notifications and reports, and it can be changed later.
- 6. Click **Authenticate** to start the process of granting the access token. You will be redirected to the *Microsoft sign-in* page. Enter Global Admin credentials to sign in to your Microsoft account.

#### **IMPORTANT!**

The user that you enter **must** have Global Admin permissions.

#### 3.3.2 Configuring a OneDrive Backup Task

)obs	Connected #					0
Becovery 8	Backup Settings The automatic addition/deletion of an account, site, domain, table or drive can	affect your monthly or annual billing amount				
Activity	Se andre al data dei benerit O	0	Backup Datacenter	0	Retention Period	0
(Settings	Automatically activate new sites: 0	0 0	Europe (melano)			
	- addressed actives into the		Backup Frequency		Backup Hour (UTC)	
	Retain auto-archived backups for days before deleting 0	9 0	Daily		22:00	. v .
	Bulk Activation and Management					

- 1. You can change the name of the backup task by clicking the pencil icon.
- 2. The Connected / Disconnected icons indicate whether the application was able to connect to the specified Microsoft 365 account. If the authentication token granted for the application becomes invalid (e.g., it expires due to inactivity because you put the backup task on pause for a long time), the Connected icon changes to the Disconnected icon. To grant the application a new token, click on the icon to open the authentication dialog, and repeat the authentication process.
- 3. By default, the "Index all data for Search" option is selected, which enables Our backup service to provide you with its granular search and restore functionality. In the process, your data is temporarily decrypted for a brief period of time, and then re-encrypted once the index is built. If this goes against your company policy and you would like to disable automatic indexing, please contact our support team.

- 4. The **Automatically activate new sites** option instructs the system to detect new teams and groups, and activate them automatically.
- 5. Backups are automatically archived when an entire site is deleted. The **Retain auto-archived backups** option allows you to retain them for a specified number of days, after which they will be deleted. Otherwise, the backups will be retained indefinitely.

**Note:** The **Backup Data Center** and **Retention Period** fields are "display only," and their values can't be changed here.

6. The **Backup Data Center** field displays the Data Center location you selected when you signed up with your registration.

The **Retention Period** field displays whether a retention period has been set up. By default, we provide unlimited retention of your daily backups for as long as you maintain your account subscription. You can override this default and specify a retention period in days, months, or years by submitting a support ticket. Backups older than the retention period specified will be automatically deleted.

**Note:** Your backup storage location cannot be changed once it's been set during the account setup process. Contact Our backup service if you need to move backups to a different geographic region, or if you'd like more information on our "Bring Your Own Storage" (BYOS) option

#### 7. Backup Frequency and Backup Hour

- a. Click the drop-down list of the **Backup Frequency** field and select how often you would like the backups to occur. The available options include:
  - i. Daily
  - ii. Every 3 days
  - iii. Weekly
  - iv. 3 times a day.

b. Click the drop-down list of the **Backup Hour (UTC)** field and select the backup hour. Click **Save**.

**Note:** 3x daily backups might be subject to additional charges. Please contact our support team or your sales representative if you have any questions before changing the backup frequency.

#### 3.3.3 Bulk Activation and Management

To create a bulk activation rule, click **+Run Bulk Activation**.

Bulk Activation and Management 
Hun Bulk activation

Click Activate by MS365 Groups, and then click Next.

Bulk Activation and Management		0 • •
Activate By MS365 Groups Use MS365 Groups to activate groups

#### 3.3.4 Activating a Backup Task

Once you have configured your backup settings, you need to **Activate** them, in order for them to begin backing up your data.

For instructions, see "Activating Your Backups."

#### 3.3.5 Modifying the Settings of an Existing Backup

See instructions in "Modifying the Settings of an Existing Backup."

#### 3.3.6 Removing a Backup

See instructions in <u>"Removing a Backup."</u>

## 3.4 Microsoft 365 SharePoint

#### 3.4.1 Adding a Microsoft 365 SharePoint Backup Task

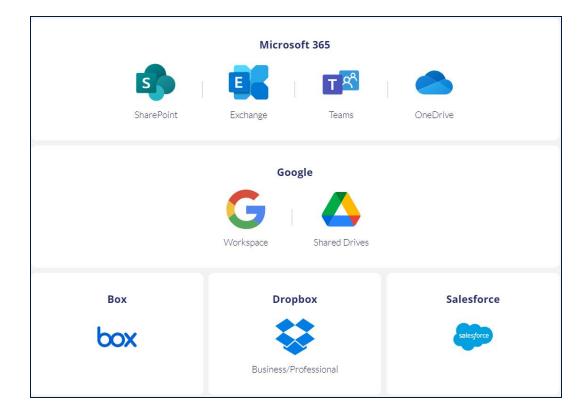

**Note:** In order to back up all data, our backup service assigns the backup user to be the site collection administrator. If our backup service is unable to do so (for example, because the user doesn't have proper permissions), then the user needs to be added manually.

#### To create a new backup task:

- 1. Sign in to your Account, or if you are already signed in, click the **Homepage** option in the Navigation Panel.
- 2. On the Homepage, click + Add Backup Task.

The following page is displayed:

8. Click the name of the service you would like to back up.

Enter your admin details	
* Backup Name	
Enter your backup name	
Our authorization process uses OAuth and requires a Global Admin account.	
Cancel	Authenticate

- 9. Fill in the name of the backup task. This name is used in the notifications and reports, and it can be changed later.
- 10. Click **Authenticate** to start the process of granting the access token. You will be redirected to the *Microsoft sign-in* page. Enter Global Admin credentials to sign in to your Microsoft account.

#### **IMPORTANT!**

The user that you enter **must** have Global Admin permissions.

### 3.4.2 Configuring a Microsoft 365 SharePoint Task

This set of options enables you to select the backup settings for the account, team or site. Click the gear-shaped Settings icon.

- 1. You can change the name of the backup task by clicking the pencil icon.
- 2. The Connected / Disconnected icon indicates whether the application was able to connect to the specified Microsoft 365 account. If the authentication token

granted for the application becomes invalid (e.g., it expires due to inactivity because you put the backup task on pause for a long time), the Connected icon changes to the Disconnected icon. To grant the application a new token, click on the icon to open the authentication dialog, and repeat the authentication process.

- 3. By default, the "Index all data for Search" option is selected, which enables our backup service to provide you with its granular search and restore functionality. In the process, your data is temporarily decrypted for a brief period of time, and then re-encrypted once the index is built. If this goes against your company policy and you would like to disable automatic indexing, please contact our support team.
- 4. The **Automatically activate new sites** option instructs the system to detect new sites, and activate them automatically.
- 5. Backups are automatically archived when an entire site is deleted. The **Retain auto-archived backups** option allows you to retain them for a specified number of days, after which they will be deleted. Otherwise, the backups will be retained indefinitely.
  - **Note:** The **Backup Datacenter** and **Retention Period** fields are "display only," and their values can't be changed here.
- 6. The **Backup Datacenter** field displays the Datacenter location you selected when you signed up with your registration.

The **Retention Period** field displays whether a retention period has been set up. By default, we provide unlimited retention of your daily backups for as long as you maintain your account subscription. You can override this default and specify a retention period in days, months, or years by submitting a support ticket. Backups older than the retention period specified will be automatically deleted.

**Note:** Your backup storage datacenter cannot be changed once it's been set during the account setup process. Contact our backup service if you need to move backups to a different geographic region, or if you'd like more information on our "Bring Your Own Storage" (BYOS) option.

#### 7. Backup Frequency and Backup Hour

- a. Click the drop-down list of the **Backup Frequency** field and select how often you would like the backups to occur. The available options include:
  - i. Daily
  - ii. Every 3 days
  - iii. Weekly
  - iv. 3 times a day. Note: 3x daily backups might be subject to additional charges. Please contact our support team or your sales representative if you have any questions before changing the backup frequency.
- b. Click the drop-down list of the **Backup Hour (UTC)** field and select the backup hour. Click **Save**.
- 8. Bulk Activation see below.

### 3.4.3 Bulk Activation and Management

To create a bulk activation rule, click +Run Bulk Activation.

Click Activate by SharePoint URL, and then click Next.

Bulk Activation and Management		0 • •
Activate By SharePoint URL Use SharePoint URL to perform one-time activation or create an activation rule		
	, ,	
	Cancel	Next

Choose a filter to locate which SharePoint URLs you would like to back up, and click **Next**.

Bulk A	ctivation and Mano	agement		• • •
URL	Begins with	allcompany	$\bigcirc$	
← Bac	k			Cancel Next

You have the option of a **one-time activation**, which will only run once, or **Create an activation rule**, which will run automatically. It checks daily to see if there are new SharePoint sites that match the conditions set in the activation rules (for example, "begins with X, " "ends with Y"), and then backs up these sites.

- 1. You can change the name of the backup task by clicking the pencil icon.
- 2. The Connected/ Disconected icon indicates whether the application was able to connect to the specified Microsoft 365 account. If the authentication token granted for the application becomes invalid (e.g., it expires due to inactivity because you put the backup task on pause for a long time), the Connected icon changes to the Disconnected icon. To grant the application a new token, click on the icon to open the authentication dialog, and repeat the authentication process.
- 3. By default, the **Index all data for Search** option is selected, which enables our backup service to provide you with its granular search and restore functionality. In the process, your data is temporarily decrypted for a brief period of time, and then re-encrypted once the index is built. If this goes against your company

policy and you would like to disable automatic indexing, please contact our support team.

- 4. The **Automatically activate new groups/teams** option instructs the system to detect new teams and groups, and activate them automatically.
- 5. Backups are automatically archived when an entire team or group is deleted. The **Retain auto-archived backups** option allows you to retain them for a specified number of days, after which they will be deleted. Otherwise, the backups will be retained indefinitely.
  - **Note:** The **Backup Datacenter** and **Retention Period** fields are "display only," and their values can't be changed here.
- 6. The **Backup** field displays the Datacenter location you selected when you signed up with your registration.
  - **Note:** Your backup storage datacenter cannot be changed once it's been set during the account setup process. Contact our support team if you need to move backups to a different geographic region, or if you'd like more information on our "Bring Your Own Storage" (BYOS) option.
  - a. The **Retention Period** field displays whether a retention period has been set up. By default, we provide unlimited retention of your daily backups for as long as you maintain your account subscription. You can override this default and specify a retention period in days, months, or years by submitting a support ticket. Backups older than the retention period specified will be automatically deleted.

#### 7. Backup Frequency and Backup Hour

- a. Click the drop-down list of the **Backup Frequency** field and select how often you would like the backups to occur. The available options include:
  - i. Daily
  - ii. Every 3 Days

- iii. Weekly
- iv. 3 times a day.
- b. Click the drop-down list of the **Backup Hour (UTC)** field and select the backup hour. Click **Save**.
- **Note:** 3x daily backups might be subject to additional charges. Please contact our support team or your sales representative if you have any questions before changing the backup frequency.

### 3.5.3 Activating a Backup Task

Once you have configured your backup settings, you need to **Activate** them, in order for them to begin backing up your data.

For instructions, see "Activating Your Backups."

### 3.5.4 Modifying the Settings of an Existing Backup

See instructions in "Modifying the Settings of an Existing Backup."

### 3.5.5 Removing a Backup

See instructions in <u>"Removing a Backup."</u>

# 4 Recovering Your Backed Up Data

# 4.1 Microsoft 365 Exchange: Performing a Full Mailbox Recovery

- 1. There are two ways to perform a one-click full mailbox recovery:
  - a. From the Homepage, on the Microsoft 365 backup that you would like to restore or export, click **Recovery.**

MS Exchange Backup &     Microsoft Exchange     Succeeded	Total 🕲 55	Active 🛛	Total Size 5.75 MB	Last Snapshot 8 days ago	Next Backup In 11 hours	Recovery     Recovery     Backup Now	:
---	---------------	----------	-----------------------	-----------------------------	----------------------------	--------------------------------------	---

b. OR: From the Homepage, click the backup you would like to restore. Locate the user account you want to restore, and click the **Recovery** icon in the **Actions** column.

3. Click Full Mailbox Recovery.

Full Mailbox Recovery	
Recover a complete Exchange mailbox or only certain Sub Services. The selected sub services will be completely recovered.	
Choose Recovery Options:	
Export  Restore	
Selective Mailbox Recovery	
Browse & Search Exchange mailbox backups and select which items to recover.	

The subsections below explain about the two options: Export or Restore.

## 4.1.1 Exporting Your Backed Up Data

1. Click **Export** to download a .zip file of your backed up data.

Full Mailbox Recovery	
Recover a complete Exchange mailbox or only certain Sub Services. The selected sub services will be completely recovered.	
Choose Recovery Options:	
Export      Restore	
Selective Mailbox Recovery	
Browse & Search Exchange mailbox backups and select which items to recover.	

- 2. Choose the backup you want to export.
  - a. First option: restore the Last Backup.
  - b. Second option: click **Specific Backup Date** and select a backup date from the calendar with a backup status indication. Once you click a particular date, a card will open, indicating whether the backup was successful, partially successful, or if it failed.

Calendars		Access key	
		Secret Key	
Notes			ø
		Data Center	
or full Mailbox Export we use Outloo		US East (Northern Virginia)	V

- 4. Click the gear-shaped settings icon. The following options are available:
  - a. Legal holds: Choose this option if you want to export all legal / litigation holds placed on this mailbox using Microsoft's Exchange Online Archive (EOA) service.
  - b. **Export deleted items**: recover items that were deleted in the past, even those that are no longer in the Deleted or Recoverable Items folders.
  - c. Use 20 GB chunks for .pst: By default, we download data in 5 GB files. But if your backed up data is large, you can choose to download in 20 GB chunks instead.

5. Add an optional Job Label to describe this specific job. It will appear on the Jobs page so you can distinguish between your different exports.

- 6. Select the export ZIP destination, such as direct download, Amazon S3, Azure Blob, Box, Dropbox, AWS S3 Compatible (if you are bringing your own storage) or Google Cloud Platform. Depending on which option you choose, there will be other data to complete (e.g., Bucket Name, Access Key and Secret Key for Amazon S3).
- 7. Review the information on the confirmation screen. If the information is correct, click **Export** to begin the recovery task. (If the information is not correct, click **Cancel**.)

# 4.1.2 Restoring Your Backed Up Data

1. Click **Restore** to recover your backed up data and store it either in its original location or a different one.

- 10. Choose the backup you want to restore.
  - a. First option: restore the Last Backup.
  - b. Second option: click **Specific Backup Date** and select a backup date from the calendar with a backup status indication. Once you click a particular date, a card will open, indicating whether the backup was successful, partially successful, or if it failed.

		Notes	Non-destructive restore
			Data will be restored to a subfolder.

- 12. Add an optional Job Label to describe this specific job. It will appear on the Jobs page so you can distinguish between your different restores.
- 13. Restore Destination: Choose where to restore your backup to:
  - a. The default is to restore to the original account.
  - b. Alternatively, you could restore to a different account, provided it is within the same domain. Click that option, and select an account from the drop-down list.
- 14. Restore Type: Choose one of the following:
  - a. Non-destructive restore:
    - i. Existing data will remain as-is.
    - ii. Deleted items and folders will be restored from the snapshot to a new, dedicated folder with the name [Restored] *name*. The original folder structure will be preserved.
    - iii. Use this option: to keep restored data separate, enabling manual drag & drop of items to relevant folders
  - b. **Replace restore**: The restored items will be located in the same place as the existing items, not in a separate folder, which is created when you choose non-destructive restore.
    - i. Deleted items and folders will be restored from the snapshot.
    - ii. Existing items will be overwritten with the snapshot version.
    - iii. Use this option: to restore or repair deleted / modified items
  - c. **Bypass restore**: Restored content will be located in the same place as the existing items.
    - i. Deleted items and folders will be restored from the snapshot.
    - ii. Existing items will be skipped.
    - iii. Use this option: to restore deleted data
- 15. Review the information on the confirmation screen. If the information is correct, click **Next** and then **Restore** to begin the recovery task. (If the information is not correct, click **Cancel**.)

							Cancel Confirm				

Legend: Meaning of Calendar Dots

Dot Color	Meaning
Green	Successful backup
Orange	Partially successful backup
Two dots	Multiple backups on that date

Select your desired date, and click **Confirm**.

### 4.2.3 Browsing Your Backups

Each of the backed up sub-services has a card: Emails, Contacts, Tasks, Calendars and Notes.

O Homepage	Browse Backup for "MS Exchange Backup" Homepage > MS Exchange Backup > Bob Smith					
jabs	User Name Bob Smith	Email bob.smith@ca4software.onmicrosoft.com	Last Backup 13 hours ago	Total Size 20.55 MB	Backup Status Succeeded	
Recovery Activity	Mar 08, 2023 or 04:0 AM	22 i Contacts	ti € 46 i Tosks	3156 Calendars	Advanced Search C Restore a	Export
© Settings	Folders	From	Subject		Date \$	

 Each of the cards has a number on it, which shows how many items there are on that date – in the mailbox, in the list of contacts, in the list of tasks, in the calendar, or in the list of notes.  Each of the cards also has a colored status indicator, which lets you know whether the sub-service was successfully backed up, whether it was partially successful, or if it failed.

#### **Choosing Items to Restore or Export**

After you have selected the date of the backup, and the sub-service to recover, you need to choose which items to restore or export.

The Recovery folders are in the same familiar order as they are in Outlook, to make it easy for you to find the item you are looking for.

Folders
🗌 🗀 Inbox
Drafts
Sent Items
Deleted Items
🗌 🗀 Junk Email
Archive
Conversation History
Outbox
Recoverable Items
In-Place Archive
• 🗌 🗋 (Restored emails) - backup 2022-06-02 08:49
• 🗌 🗋 (Restored emails) - backup 2022-06-14 02:01

In addition to the usual folders, such as Inbox, Sent Items, and Deleted Items, at the bottom of the list you will find the Recoverable Items folder, and the In-Place Archive folder (if it has been activated) followed by our backup service Restored folders, indicated by "Restored emails" and the date of the restore.

### 4.2.3.1 Email

Select the Inbox to see its contents.

### 4.2.4 Restore

Once you select one or more items, the **Restore** button becomes active. When you click **Restore**, you will see all of the sub-services that you selected.

- You can choose to remove any of the sub-services by sliding the toggle bar to the left.
- By default, our backup service assumes you want to restore to the original account, or you can restore to a different account, as long as it is in the same domain.

## 4.2.4.1 Restore Options

When you click Restore, you will see the following screen:

Services selection and configuration	Job Label (optional)  0 /50 characters
Emails	Enter Job Label
	Restore Destination
Contacts	<ul> <li>Restore to another account</li> </ul>
Tasks	James.Doe@ca4software.onmicrosoft.com
	Restore Type
Calendars	Non-destructive restore V
Notes	Non-destructive restore
	Replace restore
	Bypass restore
	separace, encoming manadi anagla anap
	of items to relevant folders.

Add an optional **Job Label** to describe this specific job. It will appear on the Jobs page so you can distinguish between your different restores.

#### **Restore Destination**

You will have the option of:

- Restoring to the original account
- Restoring to another account in the same domain.

#### **Restore Type**

Choose one of the following:

- Non-destructive restore:
  - Existing data will remain as-is.
  - Deleted items and folders will be restored from the snapshot to a new, dedicated folder with the name [Restored] name. The original folder structure will be preserved.

- **Use this option**: to keep restored data separate, enabling manual drag & drop of items to relevant folders
- Replace restore: The restored items will be located in the same place as the existing items, not in a separate folder, which is created when you choose non-destructive restore.
  - Deleted items and folders will be restored from the snapshot.
  - Existing items will be overwritten with the snapshot version.
  - Use this option: to restore or repair deleted / modified items
- Bypass restore: Restored content will be located in the same place as the existing items.
  - Deleted items and folders will be restored from the snapshot.
  - Existing items will be skipped.
  - Use this option: to restore deleted data

#### Restore Options

If you choose Replace Restore, the following options become available:

- Add a "restored..." tag to restored items, so you will be able to identify which items were added to your account.
- Add "restored..." to Outlook folders and calendars that the Restore process created.
- Create a snapshot of the restore endpoint prior to data upload This is a local backup of the current contents of your account before the restore is implemented.

After you choose all of your **Restore** options, you can check the *Jobs* page to see the status of your job. See <u>Tracking Recovery Tasks on the Jobs Page</u> for details.

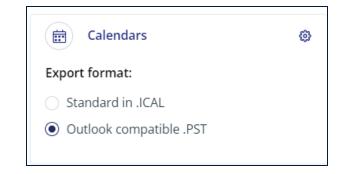

When the restore is complete, you will receive a notification email .

### 4.2.5 Export

Once you select one or more items, the **Export** button becomes active. Click **Export**.

• When you export multiple sub-services, the format will be a single PST file.

- When you export a single sub-service, you can choose to customize the export format in the following ways.
  - If you click the gear-shaped settings icon, you can choose the export format: EML or PST.
  - You can also choose to have larger, 20 GB .pst files, instead of 5 GB files.

- The gear-shaped settings icon allows you to choose the format of the download file: iCAL or PST.
- The other option that you have when you export is to choose the destination: Amazon S3, Azure Blob, Box, DropBox, AWS S3 Compatible (if you are bringing your own storage), Google Cloud Platform, or a simple Zip file.

For download	$\vee$
For download	
My Amazon S3	
My Azure Blob	
My Box.com	
My Dropbox	
My AWS S3 compatible	
My Google Cloud Platform	

**Note:** The default "for download" option exports the file to your local storage device.

 Check the *Jobs* page to track the progress of your job. "Tracking Recovery Tasks on the Jobs Page" on page 90 • When the export is complete, click **Download Results**.

• Date from / Date to: Enter the date range of the calendar you would like to restore.

## 4.3 How to Restore a Deleted Microsoft Exchange Mailbox

This procedure should be performed by a user with Administrator permissions.

- 1. Recreate all users in the Active Directory that have been deleted.
- 2. Recreate their mailboxes. Alternatively, restore the mailboxes to an existing user, but ensure that the users have a license with a mailbox.
- 3. From the Homepage, locate the Microsoft Exchange backup task you would like to restore, and then click the Recovery icon.
- 4. Select one of the active mailboxes on the list, and click Next.
- 5. In the Full Mailbox Recovery box, click Restore, and then Next.
- 6. Choose the backup you want to restore.
  - a. First option: restore the Last Backup.
  - b. Second option: click **Specific Backup Date** and select a backup date immediately prior to when the mailbox was deleted.
- 7. Select which sub-services to restore, or accept the default of restoring all services (recommended).
- 8. Select which sub-services to restore, or accept the default of restoring all services (recommended).
- 9. Choose where to restore your backup to:
  - a. The default is to restore to the original account.
  - b. Alternatively, you could restore to a different account, provided it is within the same domain. Click that option, and select an account from the drop-down list.
- 10. Review the information on the confirmation screen. If the information is correct, click **Next** and then **Restore** to begin the recovery task. (If the information is not correct, click **Cancel**.)
- 11. Check the *Jobs* page to track the progress of your job. After the restore task completes, you will receive a Confirmation Report by email.

12. The restored data will be in a newly created "(Restored)" folder. After the recovery, move the recovered data back into the appropriate mailbox folders.

**Note:** For multiple Microsoft Exchange mailboxes, please contact our support team for assistance.

## 4.4 Recovering Microsoft 365 OneDrive and Microsoft 365 SharePoint

**Note:** The screens below are from a OneDrive recovery, but the functionality is identical for SharePoint.

The Recovery Menu provides you with options at a fine granularity for selecting which sites to restore or export.

To recover your backed up data:

**Note:** In order to restore all data, our backup service assigns the backup user to be the site collection administrator. If our backup service is unable to do so (for example, because the user doesn't have proper permissions), then the user needs to be added manually.

1. Click **Recovery** from the Navigation Panel. The *Restore* & *Download* page is displayed with all your active-backup account details.

C Homepage	Restor	e & Download	
1014 Jobs	Active B	Sackups	
© Recovery	Search		
8 Antony	86	Microsoft Exchange   12 mailboxes MS Exchange Backup	>
© jerop	T	Microsoft Groups / Teams ) 8 groups / teams Groups/Teams backup:	>
		Microsoft SharePoint   11 sites Sharepoint Buckup	>
	•	Microsoft OneDrive   8 sites OneDrive backup	>

2. Click the OneDrive or SharePoint backup task from which you wish to recover the data. The *Restore or Download Active Mailboxes* page is displayed.

Restore or download Micro	soft OneDrive sites

- 3. Alternatively, you can click the magnifying glass icon in the Action column to drill down into the snapshot and view the structure of the backed up data. There you can select one or more items for recovery.
- 4. Once you select a snapshot (if you wish to recover all the data in the backup), or one or more items (if you wish to recover only selected items), the **Restore** and **Download** buttons become available.

### 4.4.1.1 Restore - OneDrive or SharePoint

If you click **Restore**, the restore confirmation window appears, asking you about the following:

- Do you want to restore to another tenant? If so, provide the email address of the administrator, the password, and the site to restore to.
  - **Note:** The administrator should have read/write access to the destination site. Therefore we suggest using a Microsoft account that has a Global Admin or SharePoint Admin role.
- Do you want to perform a non-destructive restore, where the existing data will remain as-is, and the restored data will be in a dedicated folder, preserving the original folder structure?
  - <u>Use this option</u> to keep restored data separate, enabling manual drag & drop of items to relevant folders.
  - **Note:** The non-destructive restore option only works when you are restoring from OneDrive to a SharePoint sub-site, and the option to create a SharePoint sub-site is enabled in Microsoft.
- Or do you want to perform an in-place restore? You have three options for doing so:
  - **Replace**: The restored items will be located in the same place as the existing items, not in a separate folder when you choose nondestructive restore. Deleted items and folders will be restored from the snapshot. Existing items will be overwritten with the snapshot

version.

Use this option: to restore or repair deleted / modified items.

• **Bypass:** the restored content will located in the same place as the existing items. Deleted items and folders will be restored from the snapshot. Existing items will be skipped.

Use this option: to restore deleted data.

• **Duplicate**: the restored data will be duplicated in the same location as the existing data, with a suffix that indicates that it is a copy. (The suffix contains the year, month, day, hour, minutes, and seconds, e.g., 20230401000525.) Deleted items and folders will be restored from the snapshot.

**Use this option**: to compare both versions of each file, to ensure the correct version is preserved.

• When you have completed the confirmation form, click **OK**.

Please confirm the restore request
You are about to restore items from the archive of <b>ca4software-</b> my.sharepoint.com/personal/bob_smith_ca4software_onmicrosoft_co m
• Restore to another tenant / Perform a cross site recovery
Notice: If the endpoint and source are in different domains - permissions, site groups and users will not be restored.
Please select your restore method:
• Non-destructive: Data will be restored to a sub-site.
In-place restore to the live site is also available, please select how you want to handle existing data:
<ul> <li>Replace: Restore will overwrite existing live data.</li> <li>Bypass: Existing data will be bypassed and not restored.</li> <li>Duplicate: Existing data will be duplicated.</li> </ul>
A confirmation Email will be sent to you upon completion.
Cancel OK

5. The backup data that you selected will be restored to the location that you specified. When the recovery process is complete, a summary will be sent to your email. You can also check the Jobs page to see the progress of your task. See <u>"Tracking Recovery Tasks on the Jobs Page."</u>

#### A Note About OneNote

Our backup service is able to back up and restore OneNote, both from within SharePoint and within OneDrive. Our backup service backs up and restores all content, except for the following items:

- Audio recordings (\*.wav files)
- Images created with the Draw menu
- Tables
- Page color
- Rule lines
- Text styles (e.g., Headings, Normal, etc.)
- Attachments, except for image files, which are restored (Microsoft limitation)
- Tags

#### 4.4.1.2 Export/Download - OneDrive or SharePoint

If you click **Download**, the following confirmation window appears.

Please confirm the export request	×
You are about to export items from the archive ca4software.sharepoint.com/sites/allcompa	
Export in .zip format:	
for download	~
Optionally include:	
□ All deleted items	
□ Use 20GB chunks instead of 1GB	
A notification Email with a download link will be	e sent
to you upon completion.	
Cancel OK	

1. Click the drop-down list and select one of the following storage locations:

Please confirm the export request	×
ou are about to export items from the archive o a <b>4software.sharepoint.com/sites/allcompan</b>	
export in .zip format:	
for download	~
for download	
to your Amazon S3	
to your Azure Blob	
to your Box.com	
to your Dropbox	
to your AWS S3 compatible	

- 2. If you select options other than "for download," you may be asked for additional credentials and/or access tokens for the selected storage locations.
- 3. By default, we download data in 1 GB files. But if your backed up data is large, you can choose to download in 20 GB chunks instead.
- 4. Click **OK**. The download instructions are sent to your registered email address. The download link is only valid for 72 hours.
- 5. Or, you can check the Jobs page. (See <u>"Tracking Recovery Tasks on the Jobs</u> Page.") When the task is completed, the **Download Results** button will be active.

- 3. Click **Continue**. The *Restore or download* page is displayed, showing the search results with details such as **Date**, **Subject**, and **Folder Type**, **Name and Date**. The details columns are different for different types of restored items.
- 4. Select items you would like to restore or download. When at least one item is selected, **Restore** and **Download** become available.
- 5. Follow the instructions in the <u>Restore</u> or <u>Export/Download</u> sections to complete the recovery process.

#### 4.4.3 How to Restore Deleted SharePoint Collections

- 1. Recreate all of the deleted Site Collections in Microsoft SharePoint.
- 2. Click **Recovery** from the Navigation Panel, and then click on the SharePoint backup task.
- 3. Locate the Site Collection that you want to restore, and then click the arrow icon to the right of the site. The *Restore or download* page is displayed.
- 4. Select the Via Snapshot radio button
- 5. Enter the date range that you would like to select from, or just click **Continue** for a full list of backups.
- 6. Select the backup you want to recover the one closest to the date that all of your SharePoint data was deleted.
  - a. Go to the bottom of the page, and click **Restore**.
  - b. From the pop-up dialog, click **Replace: Restore will overwrite existing live data** and then click **OK**.
  - c. Click **Yes** to the question about overwriting live data.

**Note:** You will receive an email notification when the restore is complete and can view the job status from the Jobs page.

#### 4.4.4 How to Restore Deleted OneDrive Sites

1. Click **Recovery** from the Navigation Panel, and then click on the OneDrive backup task.

- 2. Locate the Site that you want to restore and then click the arrow icon to the right of the site. The *Restore or download* page is displayed.
- 3. Select the Via Snapshot radio button.
- 4. Enter the date range that you would like to select from, or just click **Continue** for a full list of backups.
- 5. Select the backup you want to recover the one closest to the date that all of your OneDrive data was deleted.
  - a. Go to the bottom of the page, and click **Restore**.
  - b. From the pop-up dialog, click **Replace: Restore will overwrite existing live data** and then click **OK**.
  - c. Click **Yes** to the question about overwriting live data.

**Note:** You will receive an email notification when the restore is complete, and you can view the status from the *Jobs* page.

## 4.5 Recovering Microsoft 365 Teams & Groups

The Recovery Menu provides you with options at a fine granularity for selecting which account, team or site to restore or export.

To recover your backed up Teams & Groups data:

1. Click **Recovery** from the Navigation Panel. The *Restore* & *Download* page is displayed with all your active-backup account details.

C Homepage	Restor	e & Download	
) jobs	Active B	Jackups	
Recovery	Search		
8 Antony	86	Microsoft Exchange   12 mailboxes MS Exchange Backup	>
© jerop	T	Microsoft Groups / Teams ) 8 groups / teams Groups/Teams backup:	>
		Microsoft SharePoint   11 sites Sharepoint Buckup	>
	•	Microsoft OneDrive   # sites OneDrive backup	>

2. Click the Teams / Groups backup task from which you wish to recover the data. The *Restore or Download Microsoft Groups/Teams* page is displayed.

ore & Doverload -Groups/Teams backup				
Listed below are the active gro	ups within your Microsoft Groups / Te	eams domain backed up by Clo	udAlly, ready for restore	and download.
GROUP / TEAM	TYPE	FIRST BACKUP	LAST BACKUP	ACTION

Management	Tearn	26 days ago	one day ago	>
Marketing team	Group	26 days ago	one day ago	>
Sales team	Team	26 days ago	one day ago	>

This page displays all of your backed up Teams & Groups, with details such as Team/Group name, First Backup date, Last Backup date, and available Actions. Your backed-up data is ready for download from this page.

- You can filter the list using the following options:
  - Filter by statuses such as All, Active, In Process, Not Active, Scheduled, Paused, Backed-up in another task, or Archived, from the drop-down list.
  - Or: search by part or all of the Team/Group name.
- Click the arrow icon at the end of the line of the group or team which you want to restore or export (download).

The Restore or download Groups/Teams page is displayed.

Please select your preferre	d choice for restore

Use this	Item Search v s option to search all the backup snapshots of this service for a particular keyword or name. To search for an exact phrase, g an email address, use double-quotes ("). For example: "user@company.com" or "Important update".
0	Conversation
0	Calendars Calendars Channels
Se	arch in Conversation Q

- Conversation: Enter a keyword in the Search for field.
- Site: Sites refer to the SharePoint site where Teams files are stored. Enter a keyword in the Search for field. For advanced search options, click the arrow and provide the following details in the drop-down form:
  - **Author**: Enter the name of the person who created the file in the Teams channel.
  - Item Name: Enter a term that matches part of the file name.
  - **Date from / Date to**: Enter the date range during which files were sent in the Teams channel.
- **Calendars**: Enter a search keyword in the Search for field. For advanced search options, click the arrow and provide the following details:
  - **Description**: Enter a keyword that matches part of the event description.
  - **Owner**: Enter a name or email address of the calendar owner.
  - **Date from / Date to:** Enter the date range of the calendars you would like to restore.
- **Channels**: Enter a search keyword in the Search for field. For advanced search options, click the arrow and provide the following details:
  - Date from / Date to: Enter the date range of the data you would like to restore.
  - Sender: Enter a name of the person who sent messages within that

channel.

- **Channel**: Enter part or all of the channel name.
- 2. Click **Continue**. The *Restore or download* page is displayed, showing the search results with details such as **Date**, **Subject**, and **Folder**. The details columns are different for different types of restored items.
- 3. Select items you would like to restore or download. When at least one item is selected, **Restore** and **Download** become available.
- 4. Follow the instructions in the <u>Restore</u> or <u>Export/Download</u> sections to complete the recovery process.

## 4.6 How to Restore Deleted Teams Sites

Each of the deleted teams needs to be restored one at a time. If you need to restore a large number of teams, you can open a backup service support ticket to help with the restore process.

#### 4.6.1 First Step: Restore a Public Channel

**Note:** Private channels need to be exported and then restored.

- 1. Click **Recovery** from the Navigation Panel. The *Restore* & *Download page* is displayed with all your active-backup account details.
- 2. Click the Microsoft Groups/Teams backup task from which you wish to recover the data. The *Restore or download Microsoft Groups & Teams page* is displayed.
- 3. Locate the Team (not the Group that will come later) that you would like to restore. Click the arrow at the end of the row. The *Restore or download Microsoft Groups/Teams task* page is displayed.
- 4. By default, **Via Snapshot** is selected. Enter the appropriate date immediately before the Teams data was deleted, or simply click **Continue** without filling in the date fields to view all backups.
- 5. Locate the most recent Channel backup prior to the ransomware attack and select it. Go to the bottom of the page, click **Restore**, and then click **OK**.

- 6. Check the *Jobs* page to determine when the restore is complete.
- 7. Click the Homepage element from the Navigation Panel, and then click on the Teams backup task to return to the Teams backup. Click the backup service refresh icon to display the newly restored Team. You will need to perform the following steps.

**Note:** The refresh icon is not to be confused with the browser refresh button.

#### 4.6.2 Second Step: Restore the Teams Sub-Services

Perform the following steps for each of these Teams sub-services in this order:

- 1. Sites
- 2. Calendars
- 3. Conversations
- 4. Metadata this will finalize the restore, by recovering the Members, Owners, and most importantly, the Team Name.

#### For each sub-service, perform the following steps:

- 1. Click **Recovery** from the Navigation Panel, and then click the Microsoft Teams backup task from which you wish to recover the data.
- 2. Locate the most recent Team backup prior to the loss of your data. Click the arrow under the Action column to navigate to the **Restore** or **Download**

- 3. Locate the most recent Site, Calendar, Conversation, or Metadata (in that order) and select it. Go to the bottom of the page and click **Restore**.
- 4. Click the **Restore To** field and select the (Restored) channel.
- 5. For Sites, select the **Replace: Restore will overwrite existing live data** option.
- 6. Click **OK** to complete the restore.
- 7. Repeat these steps for the remaining sub-services.

#### 4.6.3 How to Restore Deleted Groups

Groups are created by Microsoft when the Teams are created. When you restored the Channel, both the Team and the Group were created at the same time. Before you begin, verify that the Group was indeed created in Microsoft.

**Note:** If you want to restore a Group, it can only be restored into a Group; Teams are restored into Teams.

Perform the following steps for each of these Group sub-services in this order:

- 1. Sites
- 2. Calendars
- 3. Conversations
- 4. Metadata this will finalize the restore, by recovering the Members, Owners, and most importantly, the Group Name.

#### For each sub-service perform the following steps:

- 1. Click **Recovery** from the Navigation Panel, and then click the **Microsoft Groups** backup task from which you wish to recover the data.
- 2. Locate the most recent Group backup prior to the loss of your data. Click the arrow under the Action column to navigate to the **Restore** or **Download**.
- 3. Locate the most recent Site, Calendar, Conversation, or Metadata (in that order) and select it. Go to the bottom of the page and click **Restore**.
- 4. Click the **Restore To** field, a select the (Restored) channel.
- 5. For Sites, select the Replace: Restore will overwrite existing live data option.

- 6. Click **OK** to complete the restore.
- 7. Repeat these steps for remaining sub-services.

## 4.7 Tracking Recovery Tasks on the Jobs Page

The *Jobs* page provides you with both high-level and drill-down views of your restore and export jobs over the last seven days.

**Note:** To see the status of your Backups, click the name of the backup from the *Homepage*.

From the Navigation pane, click Jobs.

### 4.7.1 High-Level Summary

• The top portion of the Jobs dashboard summarizes how many of your jobs are in progress, how many have successfully completed, and how many have failed over the past 7 days.

Homepage	Jobs 💩 5 Total Jobs for last 7 Days					
Jobs © Recovery	1 In Progress		2 Successfully Comple	eted	Pallures	
8 Activity	(Initiator · ) (Activity · ) (Serv	vice v (Status v)			C Search by Task	Order by 🗸 🗸

	Started at: Jul 07 2022 et 05:07 PM	Backup Date: Jul 06 2022 at 05:06 AM	Initiato bob.smit	ar: thige which ware unmicrosoft.com	Destination: bob.wnihijca4software.ovmicrosoft.com	Total Items: 0
	Cancel					View Log
	Full MS Exchange Backup Microsoft Exchange bob smith@ca4software ommicrosoft.com	-	Exp	port		Pending
(D) Support	Started at: 34 07 2022 at 05:07 PM	Backup Date: jul 06 2022 at 05:06 AM	initiator: bob.wiith@cafeoftware.onnicrosoft.c	Destination: Direct Download	Total Items: 0	Size . () Help

To see a list of jobs that have any of these 3 statuses, click on the status, and your results will be filtered accordingly.

The next section allows you to filter by numerous criteria:

- Initiator: Who initiated the backup / restore?
- Activity: Filter by restores or exports.
- Service: Filter by one of the following services, such as:
  - Microsoft Exchange
  - Microsoft SharePoint
  - Microsoft Groups / Teams
  - Microsoft OneDrive
  - Google Workspace
  - Google Shared Drives
  - Salesforce
  - Box
  - Dropbox
  - Google Account
- **Status**: Filter by one of the following:
  - In progress
  - Succeeded
  - Failed
  - Pending
  - Canceled
- Search by Task: Filter by a task, such as:
  - Microsoft Exchange
  - Teams/Groups
  - OneDrive
  - SharePoint

If you choose to filter using a particular service, then you can focus on a specific item in the search bar. You can also order by:

- Latest First
- Oldest First

### 4.7.3 Description of Each Job

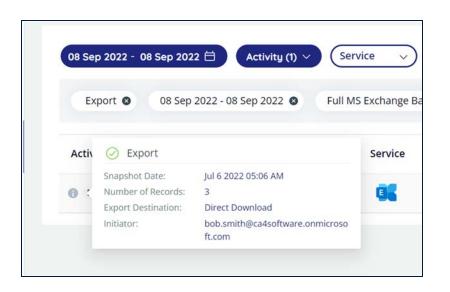

- The rest of the screen provides a detailed description of each individual job that you ran.
  - **Type of Job**: Export, or Restore this appears as a title within each job description.
  - Name, Service, and Account of the job.
  - Start date, backup date, initiator, destination, total items backed up or restored, and the size of the file(s).
- **Cancel** enables you to stop a job that is in progress.
- Download Results enables you to download a zip file with your recovery data.
- View Log redirects you to the System Activity page, which displays your account activity with details such as Activity, Date and Time, Service, Sub-Service, Status, Task Name, and Item.

08 Sep 2022 - 0	i8 Sep 2022 🗄 🛛 Activity (1) 🗠	(Service v)	Status 🗸		Q 👊 Full MS Exc	hange v) (Q. bob.smith@ca4s	) ©

Export	5ep 8 2022 12:31 PM	30	Notes	Succeeded	Full MS Exchange Backup / bob.smith@ca	bob.smith@ca4software.onmicrosoft.com	0

This page enables you to filter and search the list of backup tasks, export the list as a CSV file, and view more details on any backup task.

The latter can be achieved by clicking the information icon in the **Activity** column. The **Info** pop-up displays the backup execution time, the size of the stored data, and the number of entities, and the summary of the backup execution:

#### Microsoft 365 Backup and Restore User Guide Recovering Your Backed Up Data

# 5 Compliance

## 5.1 Delete Backed Up Data: GDPR's "Right to Be Forgotten" Option

The way to delete data items - emails and files - from a backup is to enable the GDPR (General Data Protection Regulation) "right to be forgotten" option. Our backup service supports deleting items from the following services:

- Outlook: Mail, Contacts, Calendar, Tasks and Notes
- SharePoint
- OneDrive
- Teams & Groups: Conversations, Calendars, and Sites

#### To enable the ability to delete backed up items:

- 1. Request from our support team that they enable the GDPR delete button for you. They will ask you for the name of your account, and the service for which you would like to enable this.
- 2. From the Homepage, click **Recovery**.
- 3. Click the service that contains the item you would like to delete.

Note: It is not possible to delete an entire folder, only one or more items.

4. Click the arrow at the end of the row of the account, team or site that contains the item you would like to delete.

## 6 Filtering and Viewing Drill-Down Details

This section explains the process of finding the exact backup data you are looking for using filtering.

## 6.1 Filtering by Account, Team or Site

1. Click the *Homepage* option from the Navigation Panel. The *Homepage* screen appears.

	C Sel								88
4	Bac	kups							+ Add Backup Task
		96	MS Exchange Backup & Microsoft Exchange Succeeded	Total 🕘 12	Active @	Total Size 14.81 MB	Last Snapshot 89 days ago	Next Backup In 12 hours	Recovery     Backup New
	ø	T	Groups/Teams Backup /# Microsoft Groups / Teams Succeeded	Total @ 9	Active 🕤	Total Size 390.41 KB	Last Snapshot 22 days ago	Next Backup In 9 hours	Percovery Filectup trove
	P	\$	Sharepoint Backup @ Microsoft SharePoint Succeeded	Total 🕘 12	Active @	Total Size 115.06 MB	Last Snapshot 22 days ago	Next Backup In 8 hours	Recovery     Sackup Now
	e.	•	OneDrive Backup & Microsoft OneDrive Succeeded	Total 🔕 8	Active @	Total Size 12.09 MB	Last Snapshot 22 days ago	Next Backup In 14 hours	Recovery I

2. Click the desired service from the list or enter a keyword in the Search field to find a specific task. The specific service's backup page is displayed.

This page displays all the accounts, teams, or sites available for the account you are using. The page displays the details such as:

- Microsoft Exchange: Mailbox name, Email, Microsoft Licensed / Unlicensed, Status, Backup Size, and Last Backup date
- Microsoft Teams & Groups: Group/Team Name, Type (Group or Team), Tags, Status, Backup Size, and Last Backup date
- Microsoft SharePoint and OneDrive: Site name, Tags, Status, Backup Size, and Last Backup date

It also provides the means to filter and control the associated backup tasks.

#### 6.1.1 Filtering Using Names, Statuses, or Licensing

You can filter accounts using the following options:

- Enter a search phrase in the Search by field to view all the accounts, teams or sites with the entered keyword.
- For Microsoft Exchange only: Filter by whether the mailboxes are Microsoft Licensed or Unlicensed.
- Filter by statuses such as Not Active, Scheduled, Success, In Process, Failed, Paused, Archived, or Partial.

mepage	MS Exchange Backup Homepage > MS Exchange Backup										
)obs										16	0

## 6.1.2 Filtering Using Tags

Our backup service provides you with the means to add extra metadata to your backed up data in the form of "tags." For example, you might want to denote all mailboxes, accounts, or sites that belong to Managers, or all those that belong to the Sales Team.

You can use tags to quickly filter your list of mailboxes, accounts or sites.

The **Tags** option is used to search for existing tags. By default, it is not active. To activate **Tags**:

- 1. Select at least one account, team or site.
- 2. Click **Tags**, and the following screen appears.

	State	us v	Togs	
	Search ta	igs		
		No Data		
Ð	Create	New Tag		

3. To search your existing tags, enter a tag name in the Search tags field.

## 6.1.3 Creating a New Tag

To create a new tag:

1. Click Create New Tag. A pop-up appears where you can enter a new tag name.

Please enter a new to	ag name	

2. Enter a new tag name and click **Create**.

To apply tags to your accounts, teams or sites:

- 1. Select at least one account, team or site.
- 2. Click Tag.
- 3. Choose the desired tag for your account, team or sites.
- 4. Click **Apply**.

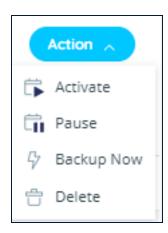

## 6.1.4 Filtering by Tag

In the **Filter by tag** field, enter a tag name. The accounts, teams or sites with those tags will appear.

- Hamepage	Full MS Exchange Backup  Homepage > Full MS Exchange Backup							
joba								٥
Recovery	3 of 12 Total Mailboxes Active Paged Arthord						3	+

	Mellbox	© Email	© Tags	Status ‡	Backup Size 💈	Last Backup 🗧	Actions	
	Asata.Brown	Agata Brown@ca4software.onmicrosoft.com	Manager		703.74 KB	one day ago	60	~
	Bob Smith	bob.smitb@ca4software.onmicrosoft.com	Manager		6.58 MB	one day ago		v
	Jacob Anderson	Jacob.Anderson@ca4software.onmicrosoft.com	(Manager)	_	551.02 KB	one day ago	00	~

#### 6.1.5 Actions

To perform actions on an account, team or site, select at least one of them on the list, and the **Action** button will be enabled. Click **Action** to see the following drop-down menu:

- Activate enables backup in all the selected account, team or sites.
- **Pause** halts the backup procedures on the selected account, team or sites.
- Backup now starts the backup immediately. The backup in this case starts as soon as a backup processing machine is available, which may take several minutes.

 Delete removes the backup task and backup data for the selected account, team or sites.

## 6.2 Viewing Backup Statistics with the Drill-down Feature

Select an account, team or site, and click the arrow button at the end of the row. This option enables you to drill down to the backup history dashboard.

Bob Smith		bob.smith@4	ca4software.onmicrosoft.com	(84	nager	20.55 MB	5 days ago 💿 🔕
02/03 0	ม่อง อ <sub>4</sub> ่อง อร์อง	06/03	07/03 08/03 09	10/03	11/03 12/03	13/03 14/0	a 15/03 16/03
Calendars	Success 📀 11/03/2023 at 04:07 AM	Tasks Items: 47 0	Success 🥥 11/03/2023 at 04:08 AM	은 Contacts Items: 33 ()	Success 11/03/2023 at 04:08		Success ② 11/03/2023 at 04:08 AM
🗅 Notes	Success 🥥 11/03/2023 at 04:10 AM						

When you drill down, you can find a diagram describing past backups, and a brief summary of the backup outcomes.

The diagram depicts the number of items backed up each day. By hovering your mouse over a column in the diagram, you can see the number of items backed up in each service. This number includes all new and changed items, so it may be greater than the total number of items in the backup. You can select the date range of the chart with the sliders underneath it. The maximum range displayed is 30 days.

The summary tiles below the chart provide at-a-glance information about the backup: for each sub-service, they display the total number of items in the backup, the date of the last backup, and the outcome.

# 7 Managing Your Account

This section guides you through the processes of managing your Account activity, account settings, password, setting up two-factor authentication, and managing users.

This page enables you to:

- Filter and search the list of backup tasks
- View more details on any backup task. This can be achieved by clicking the "i" (Info) icon. The Info pop-up displays the backup execution time, the size of the stored data, and the number of entities, and the summary of the backup execution.

🕗 Backup	
Execution Time:	Nov 5 2024 11:55 AM
Data Size:	452.70 KB
Number of Records:	51
Description:	Contacts Completed (test-101@cloudiox.com, 51 items, 63.45 KB delta data size, 0 minutes).

 Export the Activity Log as a CSV file. Any filters selected on the page will also apply to the exported log file. For example, you could choose to only see Restore tasks that have failed.

**Note:** Administrators can grant users permission to see the *System Activity* page by clicking **Settings > User Management**, and checking "View Account Activity."

### 7.1.2 Security Audit

The *Security Audit* page provides information about all the security-related actions that have happened in your account. The user activity that is displayed includes:

- Backup deleted
- User deactivated
- Settings changed
- Sign-in success or failure
- Permissions changed
- Notifications.

The page includes the date of the event, the type of activity, the service involved, the status of the activity, the account performing the activity, and the description.

The Security audit table can be exported as a CSV file by clicking **Export**.

Note: Administrators can grant users permission to see the *Security Audit* page by clicking **Settings > User Management**, and checking "View Security Audit Page."

## 7.2 Managing Your Account Settings

The *Settings* page provides you with tools to control both your account and the accounts of users whose external credentials are linked to your account. The Settings section consists of the following sub-sections:

- Account
- User Management
- Security
- Notifications
- Integrations

You can find more details on each of the Settings pages below.

 Homepage	Settings				
≣ sdot	Account	User Management	Security	Notifications	Integrations
S Recovery	0	00 (7)	$\bigcirc$	$\bigtriangleup$	Ç.
C Billing	Manage account settings	Manage other users	Manage security settings	Manage system notifications	Manage integrations with tools and services
& Activity					
Settings					

#### 7.2.1 Account Settings

This page allows you to change the name of your account and the email address. You can only change the Data Center Location by contacting our support team. Finally, this page also allows you to terminate your account.

To update or change your account details:

1. From the Navigation Panel, click **Settings** and then click **Account**. The *Settings* > *Account* page is displayed.

O Homepage	Settings Settings > Account	
⊟ Jobs	Account Name:	Bob Smith
© Recovery	Email:	bob.smith@cstoftware.onmicrosoft.com
& Activity	Data Center Location :	Europe (Indust)
() Settings	Partner ID:	
	This includes removing	Backup Service subscription, click on the REMOVE ACCOUNT button. call of your data. If my data from the Backup Service.
		Paenove Account

You can update the Account Name and/or Email.

**Note:** If you change your email address, you will receive an email sent to your new address for confirmation. The new address will not become active until it is confirmed.

Click **SAVE**. The following screen will appear. If you did not receive the confirmation email, click **Resend Email Confirmation** 

Homepage	Settings Settings > Account				
Recovery	Account Name:	Bob Smith			
Billing	Email:	Bob.smith@ca4software.onmicrosoft.com	New Email - Waiting for Approval		Discard
Security		Note: Confirmation was sent to your new	email username@company.com and	is waiting for your approval.	Resend Email Confirmation
© Settings	Data Center Location:				
					Save

## 7.2.2 Canceling Your Subscription

To cancel your subscription:

- 1. Check the box for "I approve the removal of my data from Our backup service" field and click **REMOVE ACCOUNT**.
- 2. The Are you sure? pop-up window is displayed with a confirmation request.
- 3. Click **YES** to confirm the cancellation.

**Note:** To prevent mistaken deletions, there is a grace period of 7 days after your account is terminated. After the grace period, if your account is not reactivated, all data from all your backups will be deleted.

# 7.3 User Management

The page provides tools for fine-level control of the permissions and access levels of your users.

ngs > User Management				
End User Recovery				
nd User Recovery allows all users in your Mi	crosoft domain who hav	ve Exchange backups, to log in with the	eir Microsoft credentials, access their own h	ackups and recover their data

### 7.3.1 Adding a New User

System Administrators, both those who logged in to our backup service with a username and password, or with Microsoft credentials, can add new users.

Click + Add new user to create a new user and start the configuration procedure for that user, or the pencil icon to edit an existing user's settings.

- Enter the new user's email address.
- Select the Authentication Type: Azure or Email .
- Select the permissions role for the user. Selecting the role "Administrator" enables permissions to all services and operations. Or, you can selectively choose which permissions to grant from the list of services:

O Homepage	Settings Settings > User Management >	> New user

(B) Support					Q

To save changes, scroll to the bottom of the page and click SAVE.

You will be returned to the Settings page. To complete the process, the user must confirm their email address using the link sent via email. This is a security measure, which ensures that the user's email address is valid.

The link is valid for 24 hours. If they did not confirm within this time period, or did not receive the confirmation email, click **Resend Email Confirmation**.

# 7.4 Security Settings

The Security Settings page enables you to:

Personal Password Policies	
Change your account password	Change password
You can also use Two-Factor Authentication	Activate 2FA
You can also use Two-Factor Authentication	Activate 2FA

- Update your password
- Set up two-factor authentication

You can also enforce certain security policies for your users' accounts.

Enforce Two-Factor Auth	nentication on all users 🕕
assword Expiration: 🧰	Password expires after (days): 90

- With the Enforce Two-Factor Authentication option, you can make twofactor authentication mandatory for all the users in your account.
- By setting the Password Expiration, you can enable the password expiration option for all your users – you will be also be asked for the number of days before the users' passwords expire.

### 7.4.1 Changing Your Password for Credential-Based Authorization

You can change your existing account password by performing the following procedure:

- 1. From the **Settings** >**Security** page, in the Personal Password Policies panel, click **Change Password**.
- 2. The *Change password* pop-up is displayed.

Change password	×
Current Password:	
New Password:	
Password:	
	SAVE Cancel

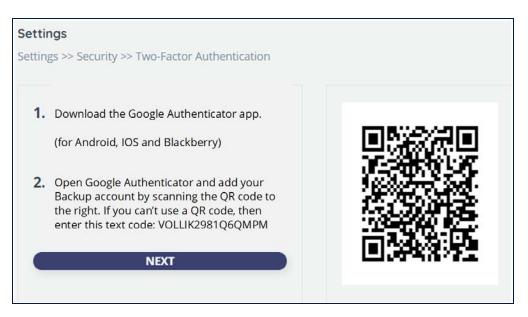

- 3. Enter the current password in the Current Password field.
- 4. Enter the new password in the New Password field.
- 5. Re-enter the new password in the Confirm New Password field.
- 6. Click SAVE. You can now use this password to access your account.

### 7.4.2 Two-Factor Authentication

Two-factor authentication provides additional security to your account and your backup data.

To enable two-factor authentication:

1. Click Activate 2FA. The Two-Factor Authentication page is displayed.

- 2. Download an Authenticator app, depending on your platform.
- 3. Open the Authenticator app and add your account by scanning the QR code provided in the web application.
- 4. If you cannot use a QR code, then enter the text code provided in the web application.
- 5. A six-digit code is generated.
- 6. Click NEXT.
- 7. Enter the 6-digit code that the application generated.
- 8. Click **ENABLE** to complete the process of activating the Two-factor authentication.

From now on, every time you sign in to your Account, you are asked to enter a 6digit code from your authentication app, after you click **SIGN IN**. Click **VERIFY** to verify the code and access the application.

### 7.4.3 SAML

The Security Assertion Markup Language (SAML) is an open federation standard that allows an identity provider (IdP) to authenticate users and then pass an authentication token to another application known as a service provider (SP).

Our backup service supports Okta as its SAML provider.

There are two steps to setting up Okta so that you can use it to log in to our backup service:

- Setting up our Backup Service in the Okta Application
- Setting up Okta in our backup service application

### 7.4.3.1 Setting up our Backup Service in the Okta Application

 In the Okta application, click Applications > Applications > Browse App Catalog.

okta		Q Search
Dashboard	÷	
Directory	÷	Applications
Customizations	~	Developer Edition provides a limited number of apps.
Applications	^	Deactivate unused apps or check out our plans page. Contact us to find a plan that is right for your organization.

### 7.4.4 IP Restrictions

Need fine-grained access control of your endpoints? You can restrict access to the Portal based on the users' IP addresses. This is especially helpful to enforce security policies and prevent unauthorized access by limiting backup/restore requests to company-approved IP addresses, such as an office IP, or a particular VPN.

### **Setting Up IP Restrictions**

To enable IP restrictions in your account, first create the list of trusted IP addresses.

**IMPORTANT!** 

It is strongly recommended to use this feature only if you have a static IP address, to prevent users from being locked out.

1. In the Settings panel, click Security, and then IP Restrictions.

O Homepage	Settings Settings > Security	Email & Password: Active
Jobs	Password IP Restrictions SAML	
(S) Recovery	IP Address Restrictions Settings	Your IP Address: 79.182.47.197
8 Activity	IP Address nestrictions allow you to control who can access your account based on their IP address. Once you configure a set of trusted IP addresses and enable IP Address restrictions, any user attempting to log in via an IP address that is not trusted will be blocked. You can define a single P address or a range of P addresse. Only IP via is accepted.	
(Settings	CAUTION: Make sure to add your own IP address and to use static IP addresses. Setting up wrong IP addresses may result in being locked out of your account.	
	Trusted IP Addresses	+ Add IP Address
	IP Description IP Address	Actions

- 2. Click + Add IP Address.
- 3. Enter one or more IP addresses:
  - a. Enter individual addresses separated by commas, and an optional description.

	d New IP Address	Your IP Address: 130.248.112.25
Ente	er IP Address description	(optional)
e.g	. Office	
You	can add one or more IP addresses,	or a range of IP addresses:
۲	Trusted IP Address(es)	
	Separate multiple IP addresses with ",".	
	Example 192.168.10.5	
	Trusted IP Address Range	
	From To	
	Example 192.168.10.0 - 192.168.10.255	

b. Or, enter a one or more ranges of contiguous addresses, and an optional description. Multiple ranges could be used to accommodate VPN and internal networks.

Add New IP Address	Your IP Address: 79.181.255.0
Enter IP Address description	(optional)
Secondary office	
You can add one or more IP addresses, or a range	e of IP addresses:
<ul> <li>Trusted IP Address(es)</li> </ul>	
Separate multiple IP addresses with ",".	
	1
Example 192.168.10.5	
Trusted IP Address Range	
From To	
- 79.181.255.0	
Example 192.168.10.0 - 192.168.10.255	
	Cancel Save

4. Once you enter at least one address, the **Trusted IP Addresses** toggle will be turned on. You can always return to disable IP restrictions later on.

age.	Security Settings Settings > Security		Email & Password: Activ

ity	Once you have configure a se	ou to control who can access your account based on their IP address. of trusted IP addresses and enable IP Address restrictions, any user attempti ress or a range of IP addresses. Only IPv4 is accepted.	tg to log in via an IP address that is not trusted will be blocked.
83	CAUTION: Moke sure to add yo	r awn IP address and to use static IP addresses. Setting up wrong IP addresses ma	y result in being locked our of your account.
	Trusted IP Addresses		+ Add IP Addr
	IP Description	IP Address	Actions .
	Office	192.168.10.5, 192.168.10.120, 192.168.40.157, 192.168.60.180	0 3

You can edit your list of addresses by clicking the pencil icon, or delete ones that you no longer want on your trusted list by clicking the trash icon.

**Note:** If you forget to include your own IP address on the trusted list, IP restrictions cannot be enabled.

Your backup service account is now protected from access by users who are not on your list.

### **Blocking Access**

If a user tries to access your backup service account from an untrusted IP address, the following "access denied" error message will appear:

		• Hone Free Yold & Los

## 7.6 Integrations

The Integrations page displays all of the available integrations to external services and systems, with an option to connect either as a self-service, or by calling Support and providing additional details.

The following types of integrations may be configured on this screen:

- SIEM (Security Information and Event Management)
- RMM (Remote Monitoring and Management /PSA (Professional Services Automation)

## 7.6.1 Splunk

The first available SIEM integration is with Splunk, using the Splunk HTTP Event Collector (HEC).

Versions Supported:

## 7.6.2 Which Events are Sent to Splunk?

You can choose to send one or more of the following to Splunk:

- **Note:** Our backup service sends events to Splunk periodically, approximately every 10 minutes.
- Customers' activity events, such as backups and restores
- Customers' Security Audit logs (see "Security Audit" on page 105)

### 7.6.3 Pre-requisite: Setting Up Your Splunk Account

Before you can connect your backup account to Splunk, you first need to establish an account with Splunk and configure the Splunk HTTP Event Collector.

Perform the following steps in the Splunk Admin Console.

1. Navigate to Settings>Data Inputs>HTTP Event Collector.

splunk-enterprise	Ages •	0	dror ben yar •	Messages •	Settings +	Addedg +	Hup+	Find	
Data inputs Set up data inputs from I	ties and directories, network ports, and scripted inputs. If you want to set up forwar Local inputs			ntances, go 10 Form					
	Type			Inputs	At	Store			
	Files & Directories Index a local file or manifor at entire directory			11	+ Acc	new			
	HTTP Event Colector Receive date over HTTP or HTTPS			8	+ 3450	new :			

- 2. Under the Global Settings option:
  - a. Enable the HTTP Event Collector by setting All Tokens to **Enabled**.
  - b. Choose **json** as default source type.
  - c. Check Enable SSL.

Edit Global Settings	5				×
All Tokens		Enabled		Disabled	
Default Source Type			_json 🕶		
Default Index			Default 🔻		
Default Output Group			None 🔻		
Use Deployment Server					
Enable SSL	~				
HTTP Port Number ?	8088				
				Cancel	Save

3. Under the New Token option, create a new token and copy the value - it will be used in the backup servicePortal.

Name	Splunk Token	
Source name override ?	optional	
Description ?	optional	
Output Group (optional)	None 🔻	

IMPORTANT NOTE: Do NOT check "Enable indexer Acknowledgment".

4. Find Your HEC URL.

The standard form for the HEC URL varies, depending on the Splunk software type you have. Find the standard form on this page: <u>Set up and use HTTP Event</u> Collector in Splunk Web.

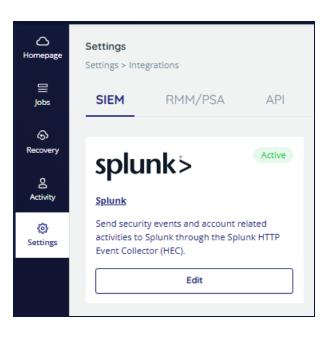

5. Verify that you have set up an SSL certificate issued by a commonly accepted certificate authority (CA) on the Splunk HEC endpoint.

### 7.6.4 Setting Up Splunk in the Portal

- 1. From the navigation pane, click **Settings > SIEM**.
- 2. Click **Splunk > Connect**. Complete the fields on the following screen:
  - a. Enter the Splunk HTTP Event Collector URL.
  - b. Paste the token value that you copied into the Splunk Token field.
  - c. Optional: Add the Event Source, which is the override value to assign to the event data.

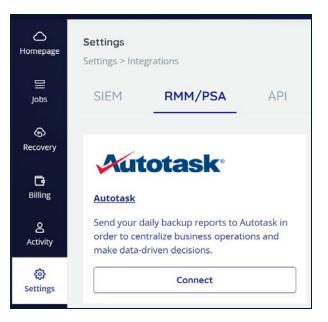

Splunk SIEM Integration	③ Splunk HEC Setup
Splunk HTTP Event Collector URL(HEC)*	
Please verify Splunk SSL Certificate.	
https://splunk.company.com:8088/serv	ices/collector/event
Splunk Token*

Event Source (Optional)	
Enter your event source	
Send Activity Events	
Send Audit Log	
	Cancel Save

- 3. By default, there are 2 options at the bottom that are selected. You can deselect any that are not relevant for you:
  - a. Send customer activity events
  - b. Send customer audit log
- 4. Click Save. The Splunk tile will now be Active.
- 5. To delete the integration, click **Edit > Delete**.

## 7.6.5 RMM/PSA

The RMM (Remote Monitoring and Management) and PSA (Professional Services Automation) page enables you to connect to Autotask.

Autotask is a PSA platform that provides complete visibility over your business with features like dashboards, sales, CRM, assets, inventory, and billing.

Once you have set up your account with <u>Autotask</u>, open a support ticket. Send us:

- Your Autotask ID
- Your Autotask Password
- The email address you'd like your reports to be sent to.

Once the support representative has enabled Autotask, we will send any backup task failure reports to the email address provided, starting from the next backup cycle.

# 8 Managing Subscriptions and Payments

# 8.1 Subscribing to Our Backup Service

Once the trial period has ended, you need to subscribe to our backup service to access and manage your backups, otherwise your backed up data will be deleted.

### To subscribe to a plan:

1. Click the **Subscribe** link displayed in your account. Alternatively, you can click the **Billing** option of the Navigation Panel.

The *Review Billing* page is displayed with the option to select either **MONTHLY** or **ANNUAL** billing options.

**Note:** You can subscribe before the end of the trial period, and the payment period will start after the trial period is over.

2. Click **MONTHLY** or **ANNUAL**, depending on your preference.

You are redirected to the *Payment Details* page. Fill in the billing and credit card details to finish the subscription process. Refer to <u>Payment Details</u> for more information.

### 8.1.1 Monthly Subscriptions

When you subscribe to a monthly plan, the credit card that you registered in the *Billing > Payment Details* page will be charged the amount that you owe.

Our backup service's billing is handled by a PCI-compliant payment processor.

To finalize your subscription, enter your credit card details and general billing information, and then click **Subscribe**.

The initial payment will be charged at the end of your 2-week trial period.

A receipt will be emailed to you each month after you are charged.

If our backup service is unable to charge your credit card (e.g., because it has expired), you will be notified by email. Additionally, a message will appear in the

application that you need to go to the *Billing Status* page so you can review your billing details, and then update your credit card information if necessary.

**Note:** The billing status is usually updated within a few minutes after the payment is complete. If the status has not updated after 24 hours, please contact our support team.

Cloud to C	Cloud Backup	A Payment Failed; Unable to charge your credit card.	Updated on Nov 07, 2022	bob.smith@ca4software.onmicrosoft.com Bob Smith │ Log Out 📑
Homepage	Billing Billing > Status			

**Note:** The monthly payments are processed automatically once you provide the required information in the Payment Details section, and it has been verified that your credit card is valid. To disable automatic payment processing, please contact our support team. Instead, you will start receiving monthly invoices for the payments.

### 8.1.2 Annual Subscriptions

When you subscribe to an annual plan, you will receive a confirmation message that your request has been submitted, and then our support team will send you an email, asking that you confirm your annual subscription request.

Once you have confirmed, our backup service will email an invoice to you, payable in 30 days by credit card, PayPal, or bank transfer.

After the initial payment, our backup service will send you an invoice 30 days before your payment is due, in 11 months. You will also be reminded that your annual subscription is due online:

**Note:** The billing status is usually updated within a few minutes after the payment is complete. If the status has not updated after 24 hours, please contact our support team.

Cloud to C	loud Backup	Reminder: Please pay your annual subscription	Classient on Nex-96, 2022 X	bob.smith@ca4software.ormicrosoft.com Bob Smith Log Out 📑
O Homepage	Billing Billing > Status			

Should you fail to make your annual payment, you will be reminded with a message like this:

After you finalize your subscription, the *Billing > Payment Details* page displays additional billing management options and provides a brief summary of the payment information for the current period and the next payment date.

## 8.2.1.1 Add New Card

The **ADD NEW CARD** option enables you to define your card information for a monthly subscription payment.

Billin	g						
Billing	g >> Payment details						
Month	hly subscription, next	payment: Dec 13th 2020					
~	Credit Card Det	ails					
	Card Number:	undefined: XXXX-XXXX-XXX	XX-444 🗸				
					ADD NEW CARD	ACTIVATE CARD	Delete card
	Add new card c	etails					
C	Card Holder's Name:	Card Holder's Name:					
С	Card Number:	Card Number	MM / YY	CVV			
							ADD NEW CARD

### To create a new payment method:

- 1. Click ADD NEW CARD.
- 2. Enter the card details such as Card Number, CVV, Card holder's name, and card expiry date.
- 3. Click ADD NEW CARD.

The new card information is saved and activated, and you can use this card.

### 8.2.1.2 Change Payment Method

#### To change your existing payment method:

- 1. Click the drop-down list and select the payment method from the Cards Number drop-down list.
- 2. Click the payment method from the list (the screen shot below depicts choosing a different credit card).
- 3. Click **ACTIVATE CARD** to set the selected card as the preferred payment method.

Billing		
Billing >> Payment details		
Monthly subscription, nex	kt payment: Dec 7th 2020

## 8.5 Billing Notification Messages

Administrators can define whether individual users will see the Billing Notification Messages on their screens (e.g., Payment Due, Payment Overdue, Payment Failed).

To turn notifications on or off:

- 1. From the Navigation Panel, click **Settings > User Management**.
- For an existing user, click the pencil icon next to the user's name.
   For a new user, the notification options will appear when you define the new user's details.
- 3. Click View billing notification messages on or off.
