1 Preface

1.1 Welcome

Thanks for being a CloudAlly Partner. CloudAlly ensures that your client's data is well protected and always available for swift restore to keep your business operational and your employees productive. We give application administrators, IT leaders and audit teams the confidence and proof that their data is appropriately backed up, safe, and ready for recovery. CloudAlly strives to build real relationships with our partners and deliver exceptional service.

We hope this User Guide will help you and your customers to utilize cloud advancements, aimed at preventing critical business data loss. Our mission is to develop and support advanced software and to provide better service to our customers. If you ever have a question or need additional help, please contact us at support@cloudally.com or search our Knowledge Base at https://support.cloudally.com/hc/en-us.

1.2 Audience

This guide is intended for Partners managing CloudAlly backup services for their customers.

1.3 What's in this Guide

This guide is organized to help you find the information you need to manage your CloudAlly customer accounts from a single portal. It is divided into functional parts intended to support you as you manage your environment:

- Getting Started
- Using the Partner Portal Dashboard
- Billing
- Settings
- Adding a New Account

2 Getting Started With Your CloudAlly™ Partner Portal

2.1 Introduction to the Partner Portal

The Partner Portal is the hub of your operations – it provides the consolidated view of all your related client accounts and the ability to:

- Directly access the existing CloudAlly accounts
- Provision new CloudAlly accounts
- Manage security settings
- View and manage reports.

The logic of the partner-client relation is the following: the accounts of the clients you add contain your PartnerID or one of the IDs of the partners you have created with the User Management settings. The PartnerID was issued for you when you signed up with CloudAlly, and the IDs of the partners registered by you are derived from your PartnerID, and therefore linked to it.

The user email ID that you provided for portal login is added as a user to all your related CloudAlly clients' accounts. This gives you the ability to click through from the portal directly to a CloudAlly client account without logging in to each account.

The portal provides some advanced management tools, such as User Management, and Notifications Management.

To get started, login in to your portal at: https://partners.cloudally.com/ with the credentials sent to you.

3 Using the Partner Portal Dashboard

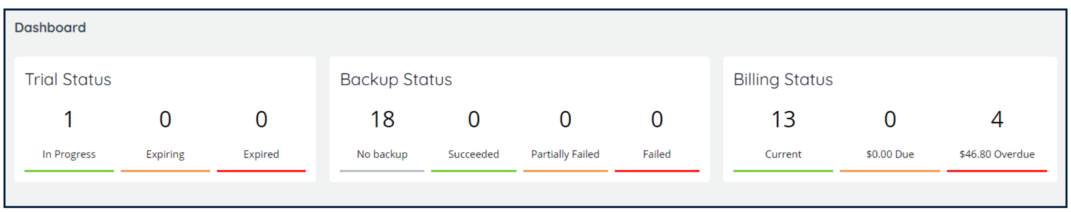
The navigation panel enables you to access the following functionality:

- Dashboard
- Billing
- Settings
- Learning Hub
- Partner Zone
- Support

This section gives an overview of the main elements of the navigation panel and available operations in each of the sections.

3.1 Partner Dashboard

The Partner dashboard provides a summary of the following information:



There are three sections:

- Trial Status
- Backup Status
- Billing Status

3.1.1 Trial Status

The Trial Status indicator shows the total number of accounts whose trial periods are active, expiring, or expired.

- The green **In progress** status shows the total number of accounts that have trial periods.

- The orange **Expiring status** shows the total number of trial accounts that are about to expire. The expiring status starts 5 days before the trial period ends. After the trial period is over, the account will be automatically deleted, and the customer will no longer have access to the backup files.
- The red **Expired status** shows the total number of accounts where the trial period ended without the user signing up for a subscription.

3.1.2 Backup Status

The Backup Status indicator shows the number of backups and the status of each:

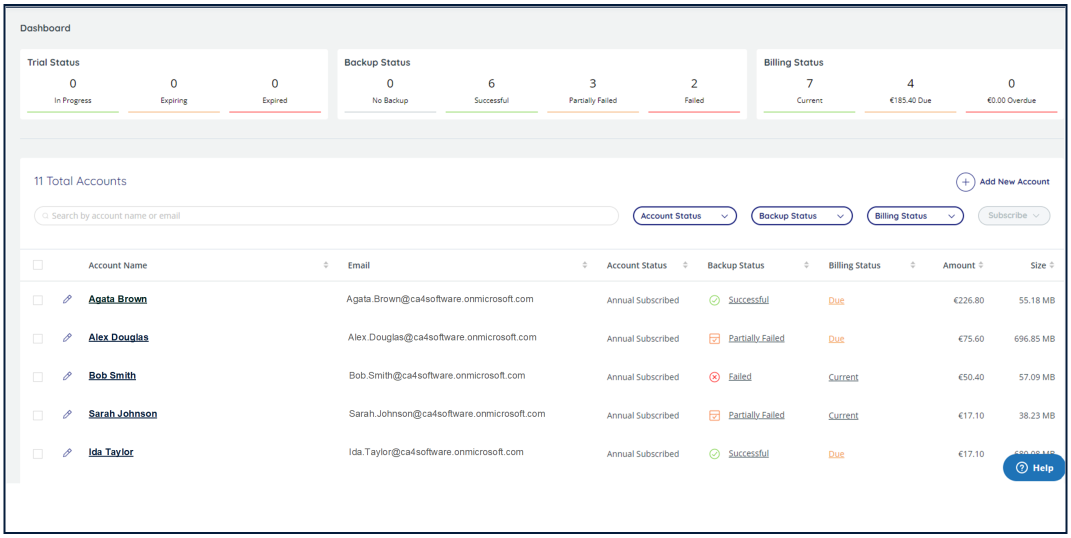
- No backup (grey)
- Successful (green)
- Partially Failed (orange)
- Failed (red)

3.1.3 Billing Status

The Billing Status indicator shows the total number of accounts and the billing status of each.

- The green **Current** status shows the total number of accounts that are fully paid up for the services.
- The orange **Due** status shows the total number of accounts that owe money, and the total amount to be paid.
- The red **Overdue** status shows the total number of accounts that are overdue in their payments, and the total overdue amount.

3.1.4 List of Accounts



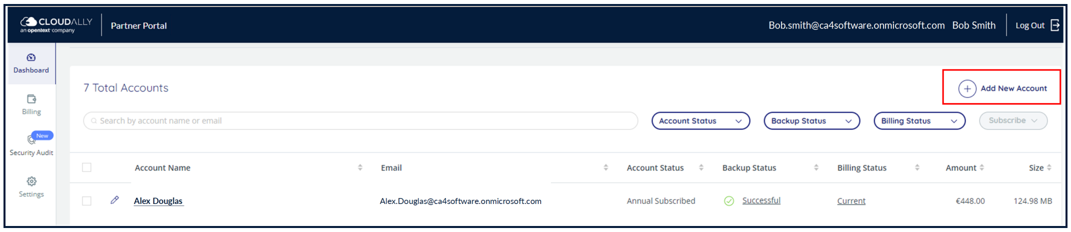
Below the dashboard, there is a list of accounts with a variety of information.

- **Account Name**: the name you have provided while creating a new customer's account.
- **Email**: the email of the customer.
- **Account Status**: show the status of the account. It displays Monthly or Annual.
- **Backup Status**: shows the status of the backups: No Backups, Successful, or Failed.
- **Billing Status**: shows whether the customer is Current, Due, Overdue or None.
- **Amount**: shows the amount forecast to be owed in the next billing cycle.
- **Size**: the total size of all backups in the customer's account.

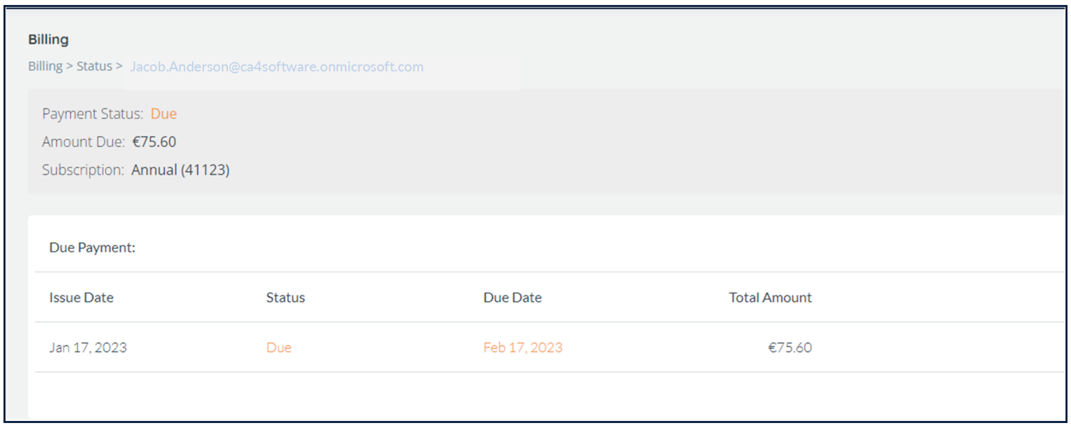
3.1.5 Features

The Partner Portal dashboard enables you to:

- Click through to an existing customer's account by clicking on the highlighted Account Name field.
- Set up a new CloudAlly customer account by clicking **+ Add New Account**

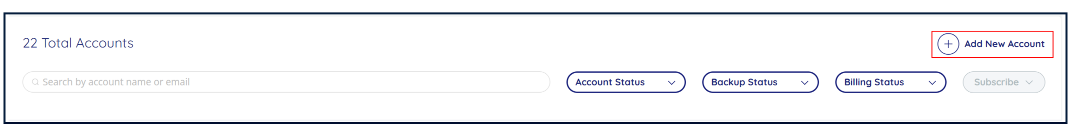


- Subscribe trial accounts by selecting one or more accounts, and then clicking **Subscribe > Annual or Subscribe > Monthly**
- See the payment details of each customer by clicking their **Billing Status.**



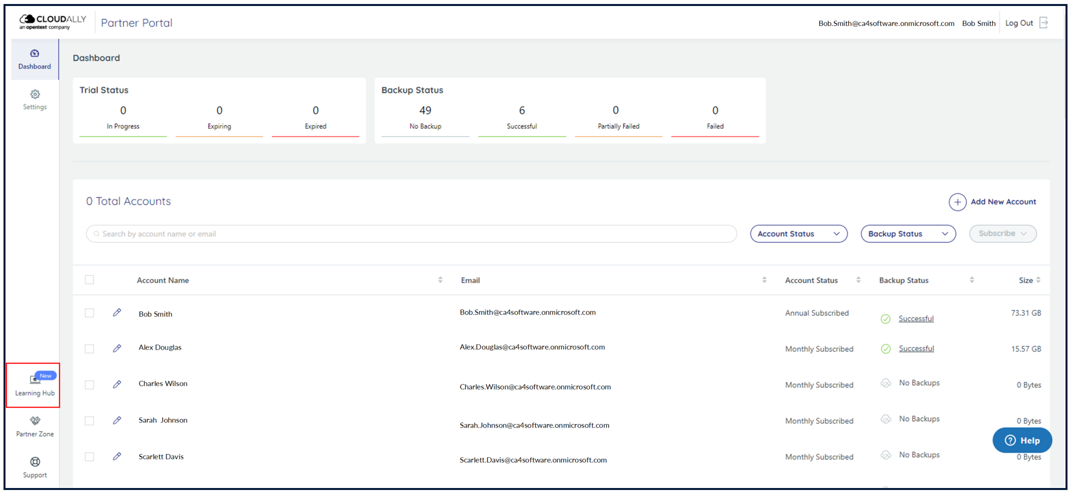
Filters

- In the Search field, you can search for an account name or email address.
- You can also filter by:
  - Account Status
  - Backup Status, or
  - Billing Status.

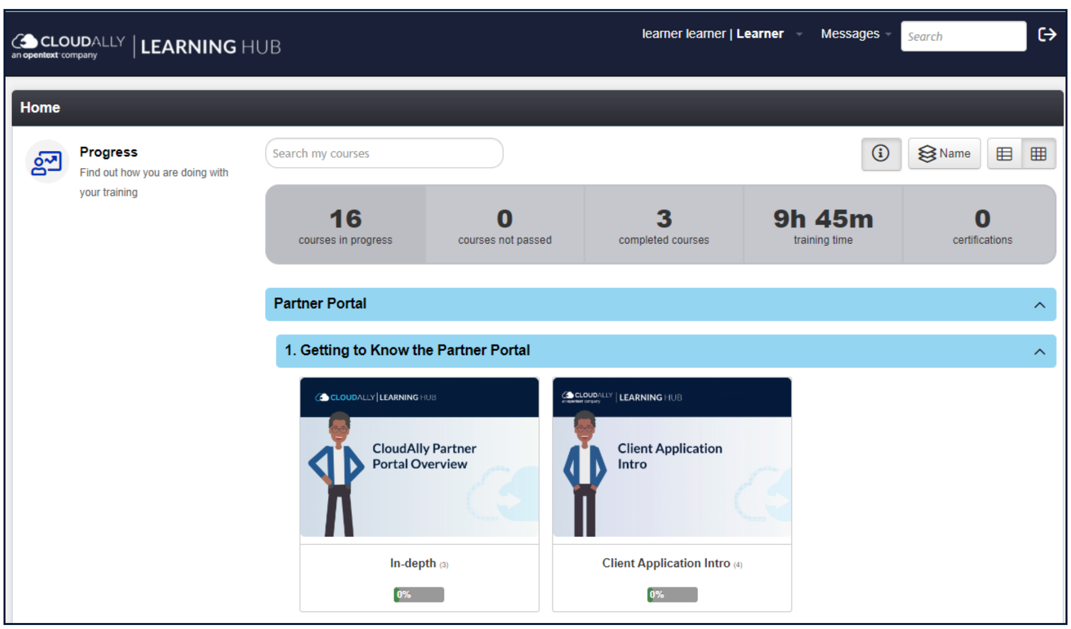


3.2 Learning Hub

CloudAlly provides you with a rich collection of instructional videos, which will teach you how to perform tasks such as backup activation and setting up an account. You can access the Learning Hub from the Navigation Panel.



After you click **Learning Hub**, you will see the following screen:



Scroll through the videos, select one that meets your needs, and click play .

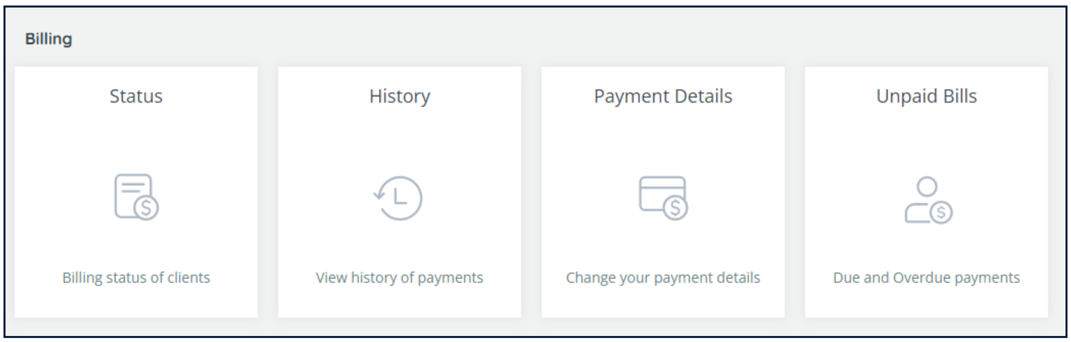
4 Billing

>

The *Billing* section aggregates the tools and settings for the billing and payment processes. The section consists of four sub-sections:

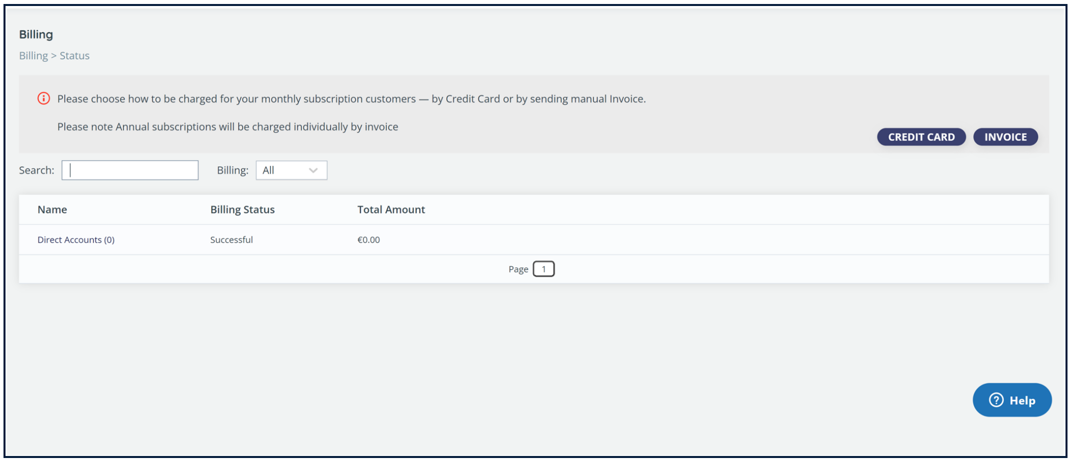
- Status
- History
- Payment Details, and
- Unpaid Bills



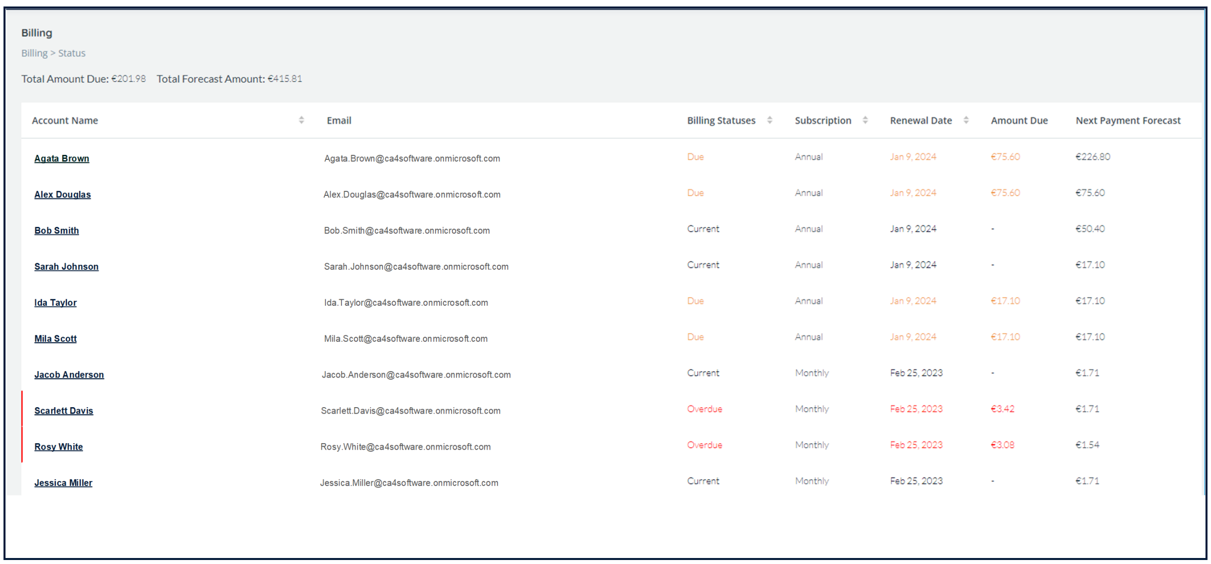
4.1 Status

The first time you enter the Billing Status screen you will need to select your default monthly billing method of either:

1. **Credit Card** – This will generate a single automated monthly credit card charge for all of your accounts that are subscribed monthly, or
2. **Invoice** – This will generate a single invoice due in 30 days and payable by credit/debit card or PayPal.



After you set up the payment method, and you begin to add customers, you will see the following *Billing Status* screen. It displays the billing status of all your customers, what type of subscription they have, when their subscription will renew, how much they owe, and how much the system projects they will need to pay during the next billing cycle.



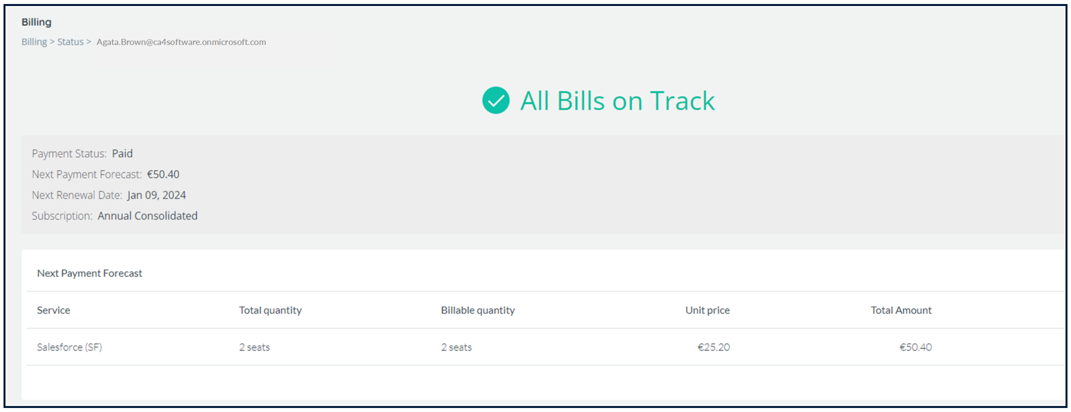
At the top of the screen, on the left-hand side, the **totals** appear summarizing how much is due currently, and the total forecast amount for the next billing cycle.

The **Billing Status** column gives a quick summary of the billing status of each of the customers' accounts.

- **Current** means that the customer has paid and does not owe any money.
- **Due** means that within 30 days, their bill will become due.
- **Overdue** means that the due date has passed, or the credit card charge has failed.

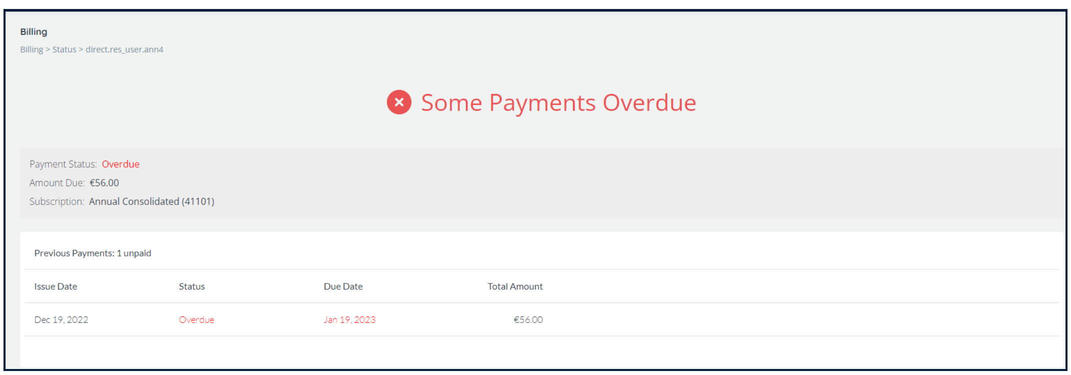
- **None** means that the customer is still during the trial period, or within the first month of their subscription, and a bill hasn't been issued yet.

You can drill down to the billing summary by clicking the **Account Name**:



- The **Payment Status** field indicates whether the account is up to date or in arrears.
- The **Next Payment Forecast** predicts how much the customer will owe during the next billing cycle, based on recent usage trends.
- The **Next Renewal Date** field lets you know when the customer's subscription is up for renewal.
- The **Subscription** field indicates whether a customer has chosen a Monthly or Annual subscription.

If a payment has not been received for this customer, the screen looks as follows.



- The **Payment Status** field indicates that the account is either Due or Overdue.
- The **Amount Due** field provides the total amount owed.

- The **Subscription** field shows whether the customer has an Annual or Monthly subscription. In the case of a Consolidated bill, there will be a reference number that you can use to search on the *Unpaid Bills* page.
- The **Previous Payments** table lists all of the charges that are still unpaid.

4.2 History

The *History* page allows you to view previous payments, and enables you to download the payment invoices/receipts:

Billing
Billing >> History

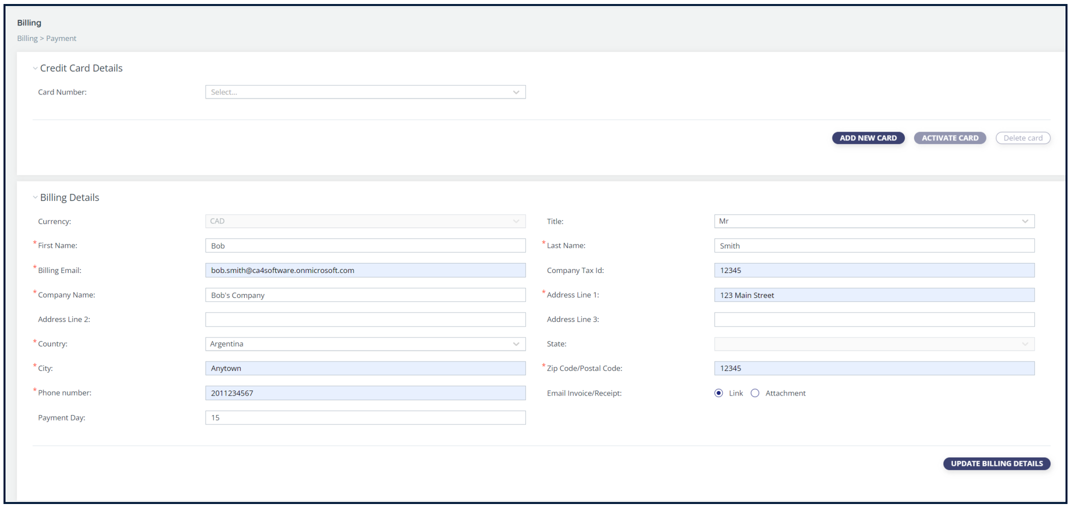
Reference Number	Account Name	Issue Date	Due Date	Amount
68030	demo-8930_monthly4	October 30, 2020	October 30, 2020	$3.24
67718	Consolidated bill	October 15, 2020	October 15, 2020	$4.86
67717	Consolidated bill	October 15, 2020	October 15, 2020	$12.00
50066	demo-8930_annual2	October 14, 2020	November 14, 2020	$36.00
50065	demo-8930_annual	October 14, 2020	November 14, 2020	$18.00
67678	Consolidated bill	October 14, 2020	October 14, 2020	$10.26
67676	Consolidated bill	October 14, 2020	October 14, 2020	$12.00
67631	Consolidated bill	October 13, 2020	October 13, 2020	$1.08
67630	Consolidated bill	October 13, 2020	October 13, 2020	$1.08

Page 1 of 1 Showing 1-9 of 9

The **Reference Number** column contains the links to the invoice documents that can be downloaded.

4.3 Payment Details

The *Payment Details* page contains your credit card number and billing address for monthly subscriptions.



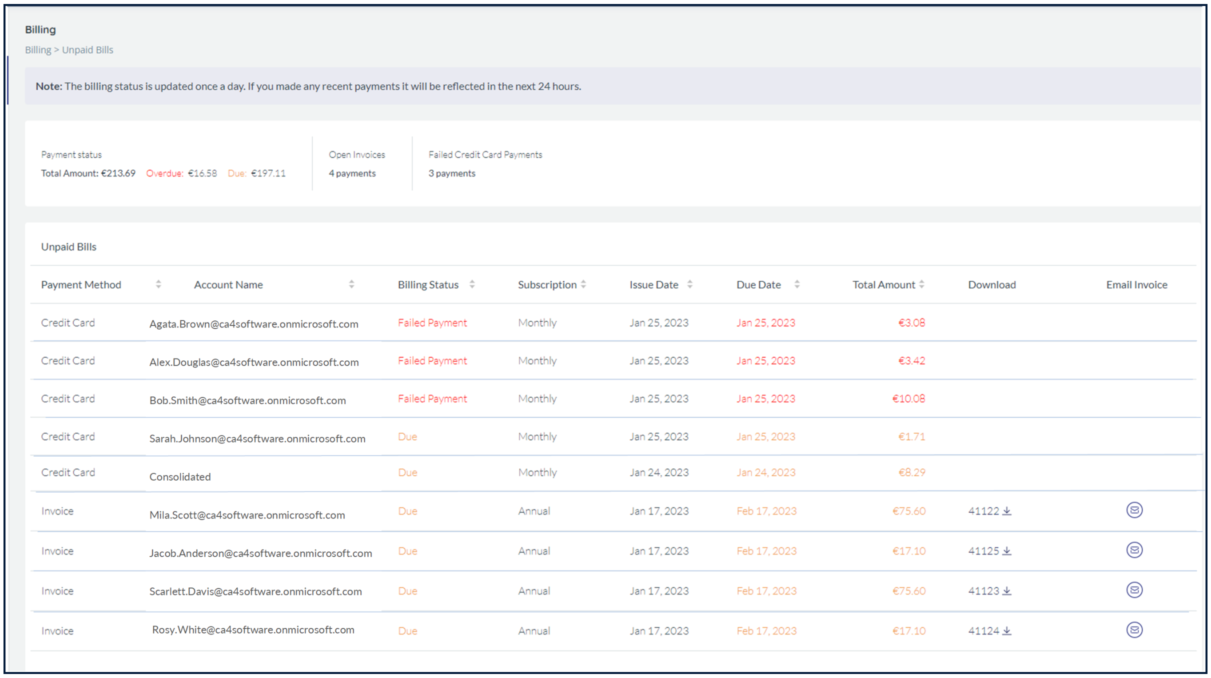
You will enter your billing details as part of your portal setup process. From the *Billing > Payment Details* page, enter your payment details, and click **Update Billing Details**.

To subscribe to accounts by monthly auto-renewing credit card payments, you will also need to complete the credit card information. CloudAlly uses a PCI compliant payment processor and does not store credit card information on the system. Leave this information blank if you want to be billed by monthly or annual invoices.

At the bottom of the *Payment Details* page, you can choose the Payment Day for the consolidated invoices. The invoices for individual monthly subscriptions and annual subscriptions are issued according to the date of their creation.

4.4 Unpaid Bills

The *Unpaid Bills* page looks as follows:



At the top of the *Unpaid Bills* page, there is a summary of:

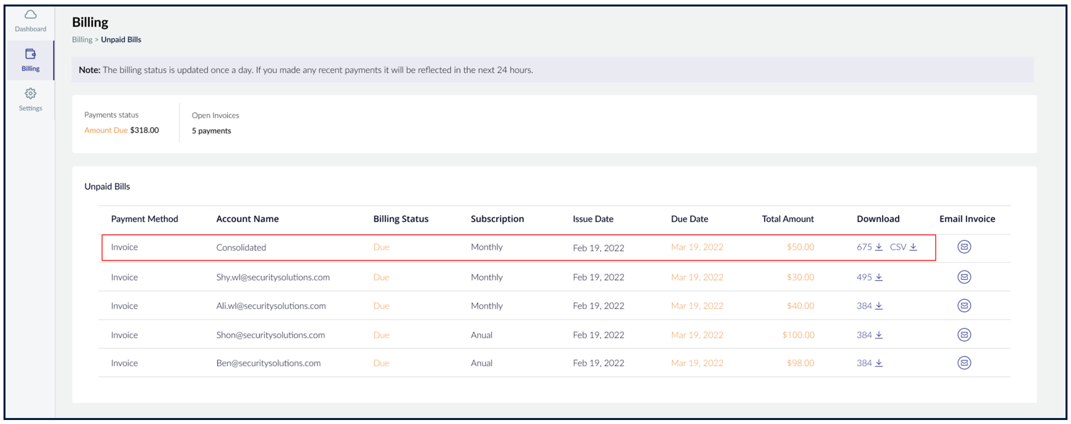
- **Payment Status**: total amount due, with a breakdown of how much is due and how much is overdue
- For those who pay their subscriptions using an invoice: How many **Open Invoices** there are.
- For those who pay by credit card: How many **failed credit card payments** there are.

> **Note:** If CloudAlly is unable to charge your credit card (e.g., because it has expired), you will be notified by email. Additionally, a message will appear in the application header to remind you to go to the *Unpaid Bills* page so you can review your billing details, and then update your credit card information if necessary.

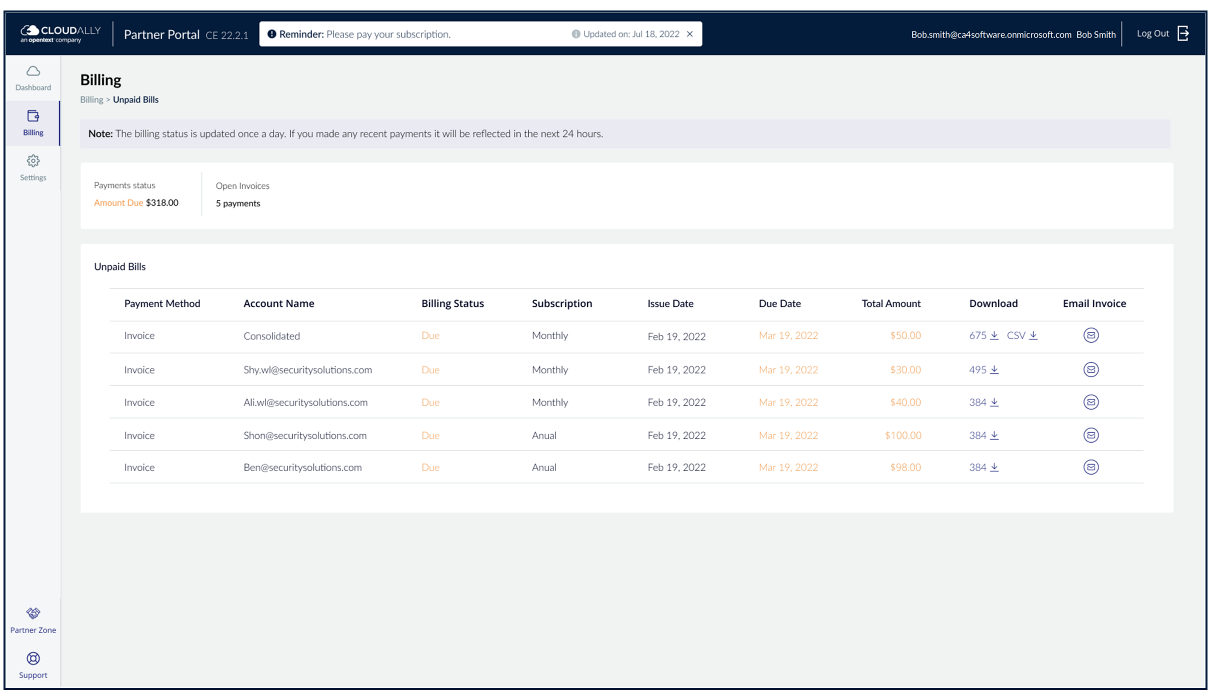
Below this summary, the *Unpaid Bills* table lists all of the accounts for which payment wasn't received, what the billing status is, what type of subscription they have (annual or monthly), when the bill was issued, when it was due, and the total amount owed.

For subscriptions that pay by invoice, it is possible to either download the invoice, or have the invoice emailed to the account.

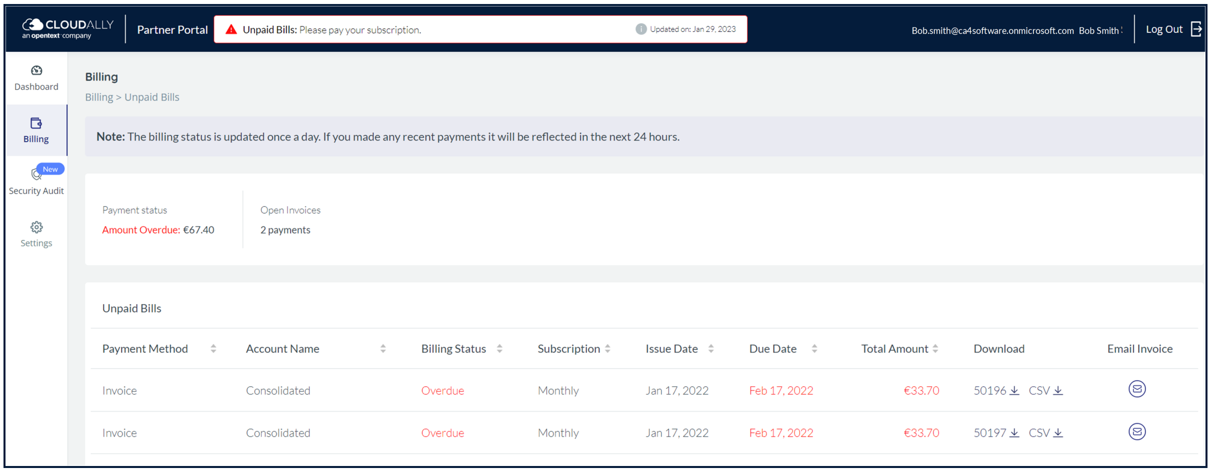
If the account name says "Consolidated," this means that numerous customers appear together, either in a single invoice or a credit card charge. It is possible to download a detailed breakdown of each customer, their related services, and the amounts due, in CSV format.



If you are paying by invoice, CloudAlly will send you an invoice by mail, and the following friendly reminder will appear at the top of the application.



Should you fail to make your payment, you will be reminded with a message like this, on all screens in the Partner Portal:

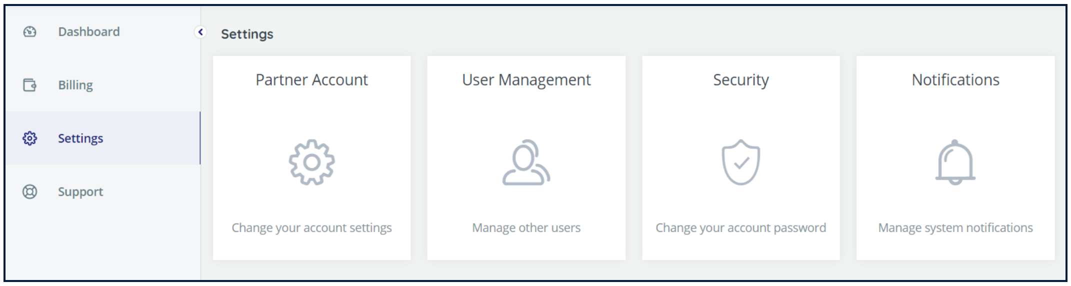


A Partner may choose to exclude various customers from the Consolidated invoice, so these names appear separately.

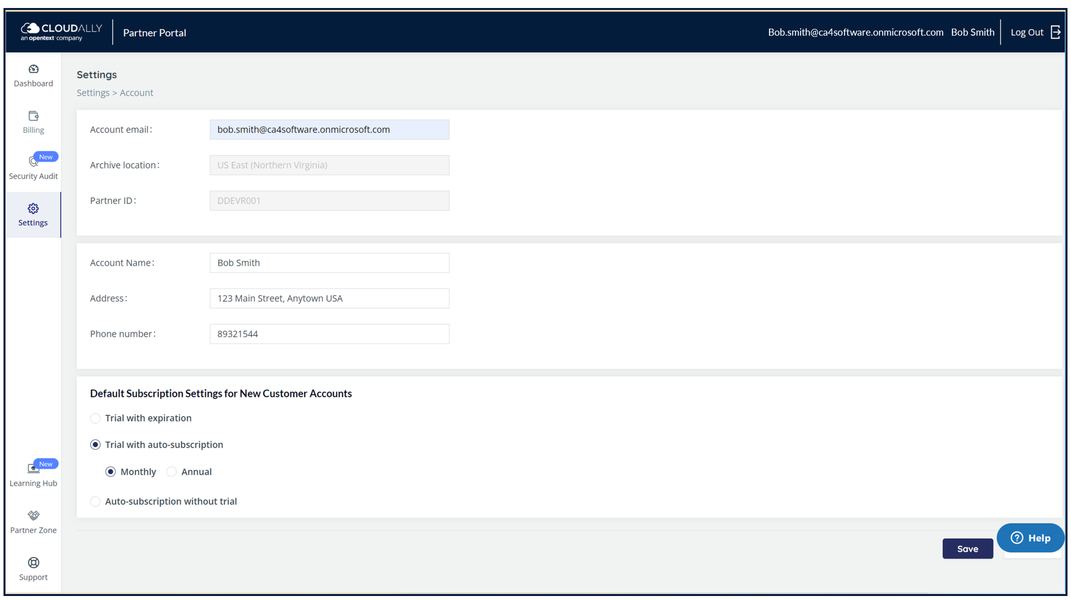
> **Note:** By default, all customers will be aggregated together in a Consolidated Invoice/Credit Card payment. If you prefer to have one or more customers excluded from the Consolidated payment, please contact CloudAlly Support. They will be charged separately.

5 Settings

Manage your Account settings, Partner Portal Users, Security Settings, and Notifications settings:



5.1 Partner Account Settings



Update your portal account email ID, name, address, and phone number here. You can also set which subscription setting will be the default for all new customer accounts.

Click **SAVE** to apply the changes.

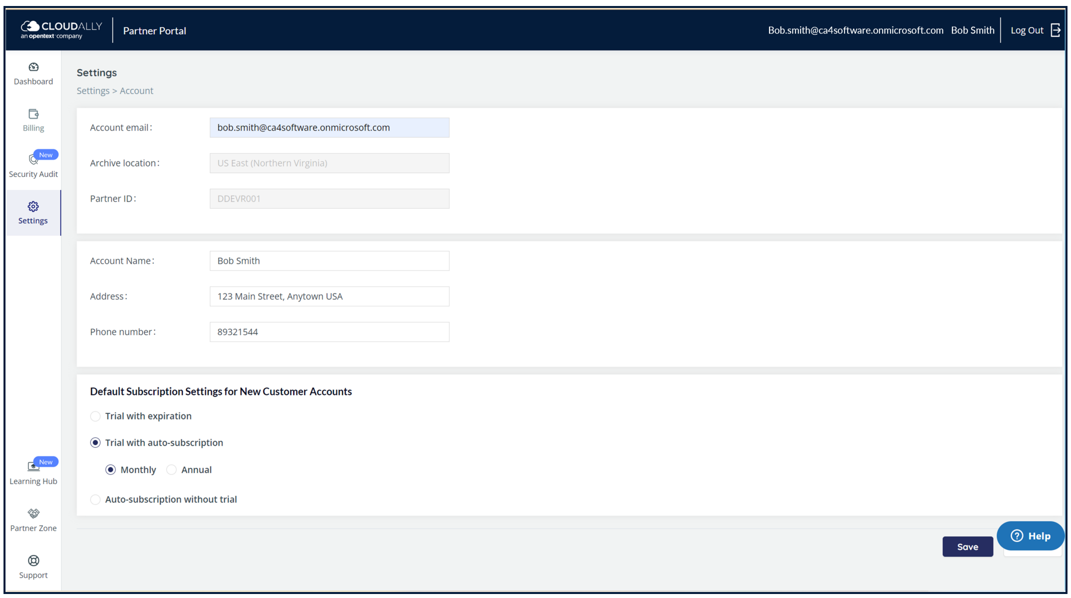
The storage location was set when your portal was configured during the registration process and it will be used as the default when setting up new accounts.

If you wish to change the storage location, you can do so by sending a request to our Support team. You can choose one of the data centers provided by CloudAlly, or you can use your own AWS storage.

5.1.1 Setting the Default Subscription Type

On the **Settings > Account** page, you can select which of the three subscription options will be the default for all new accounts that you add. You can always override the default, but it is convenient to pre-select the option that you anticipate will be your most common one:

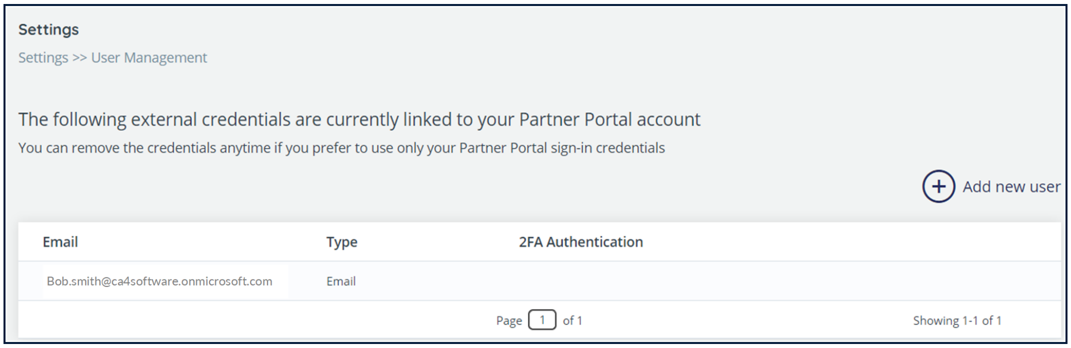
- Trial with expiration
- Trial with auto-subscription (Monthly or Annual billing)
- Auto-subscription without trial



5.2 User Management

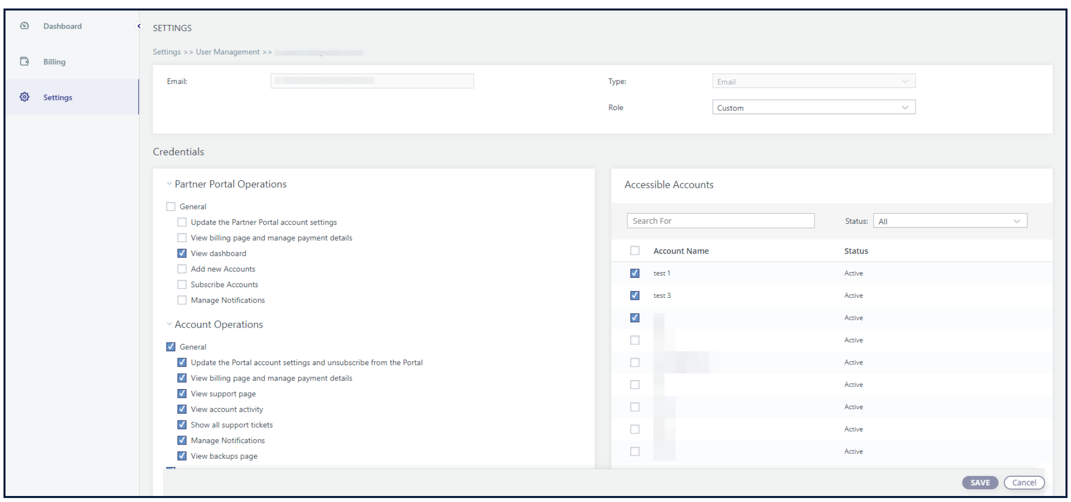
You can add other internal Partner Portal users as needed via the User Management function. The page provides full permission management and account access controls for each user you add to your Partner portal.

To add a new Partner portal user, click **+ Add new user**, or click on the icon to edit an existing user's settings.



Users can be added by either Email credentials, or by Azure, Google+, or Facebook OpenID. Select the Type from the dropdown menu, and then enter the user's email ID. By default, all of your customer accounts will be accessible to the new partner portal user. You can limit that access by clearing the Account Name box in the Accessible Accounts section, and manually selecting those accounts that the user should be able to access. The accounts that are not accessible for the users are not displayed in their dashboard.

The next step is to select the overall Partner Portal Operations options. To activate the Account Operations options below, you will need to first select View dashboard and/or Add new Accounts.

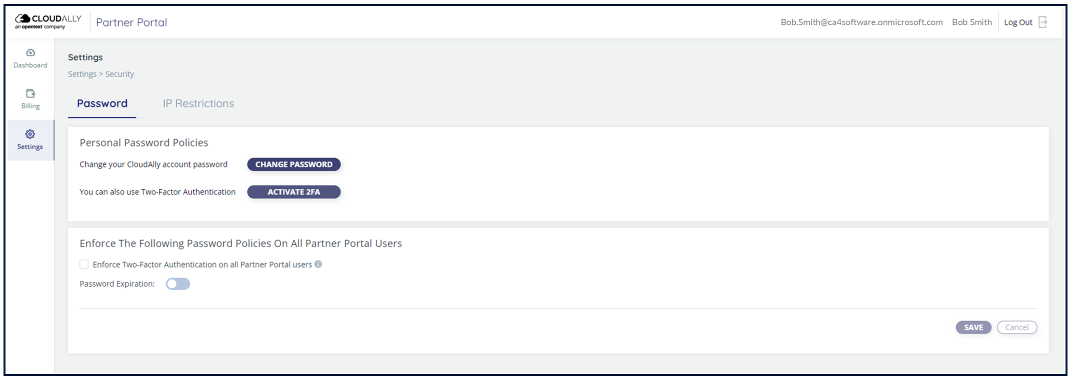


Note: Selecting the role "Administrator" enables all services and operations, but doesn't affect the list of accessible user accounts.

Once the Account Operations options are activated, you can then select the specific functions that this user should be able to perform.

5.3 Security Settings

In this area, you can update your portal password, set up two-factor authentication, or set up IP restrictions.



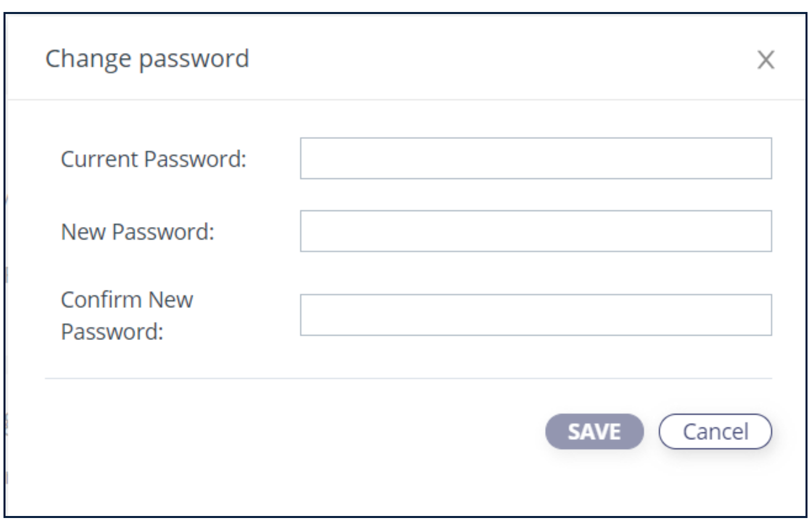
You can enable the password expiration option for all your users – the expiration policy will be enforced on their accounts.

5.3.1 Changing your Partner Portal Password

You can change your existing account password as follows:

1. From the Navigation panel, select **Settings** and then **Security**.
2. On the *Password* screen, click **CHANGE PASSWORD**.

The *Change Password* screen is displayed.



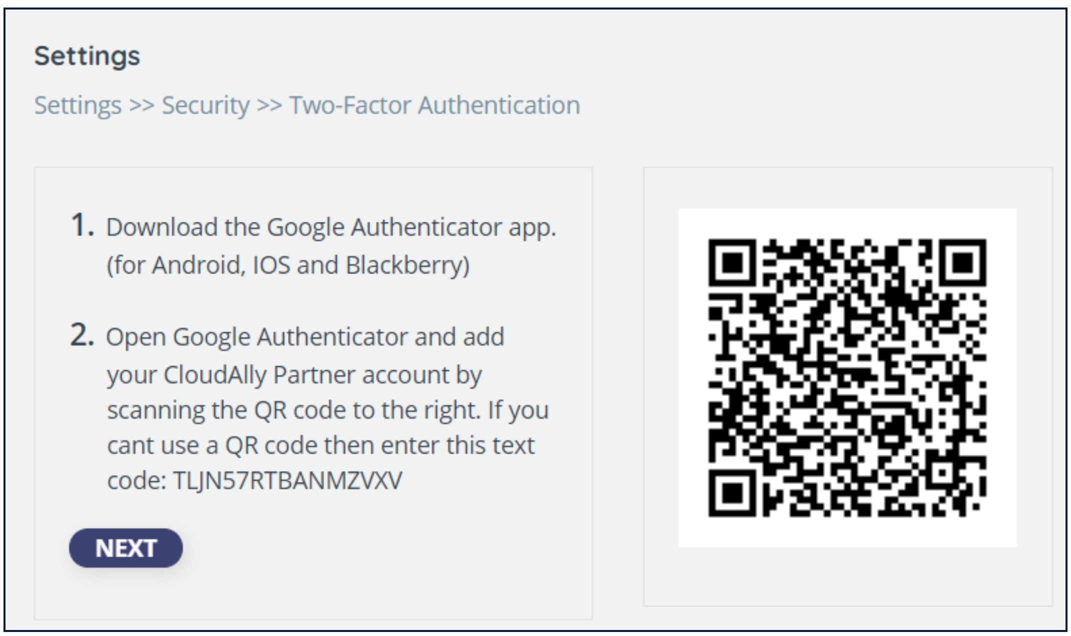
3. Enter the current password in the **Current Password** field.
4. Enter the new password in the **New Password** field.
5. Re-enter the new password in the **Confirm New Password** field.
6. Click **SAVE**. You can now use this password to access your Partner Portal account.

5.3.2 Two-Factor Authentication

Two-factor authentication provides additional security to your CloudAlly account and your backup data. Perform the following procedure to enable two-factor authentication:

1. Click **ACTIVATE 2FA** element from the Navigation Panel of the CloudAlly web application.

The Two-Factor Authentication page is displayed.



2. Download an Authenticator app, depending on your platform (Android or iOS).
3. Open the Authenticator app and add your CloudAlly account by scanning the QR code provided in the CloudAlly web application.

If you cannot use a QR code, then enter the text code provided in the CloudAlly web application.

A six-digit code is generated.

4. Click **Next**.

Enter the 6-digit code that the application generated.

5. Click enable to complete the process of activating the Two-factor authentication.

From now on, every time you sign in to your CloudAlly account, you are asked to enter a 6-digit code from your authentication app, after you click **SIGN IN**. Click **VERIFY** to verify the code and access the application.

5.3.3 IP Restrictions

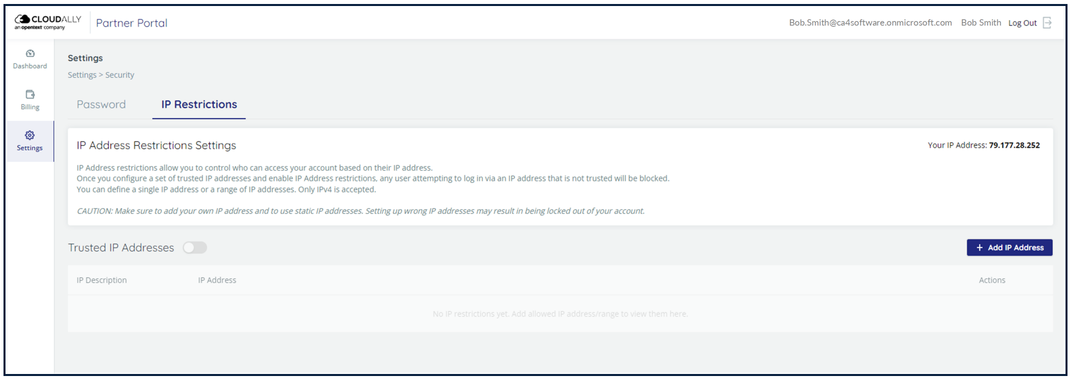
Need fine-grained access control of your endpoints? You can restrict access to the Partner Portal based on the users' IP addresses. This is especially helpful to enforce security policies and prevent unauthorized access by limiting backup/restore requests to company-approved IP addresses, such as an office IP, or a particular VPN.

Setting Up IP Restrictions

To enable IP restrictions in your account, first create the list of trusted IP addresses.

> **IMPORTANT!**
>
> It is strongly recommended to use this feature only if you have a static IP address, to prevent users from being locked out.

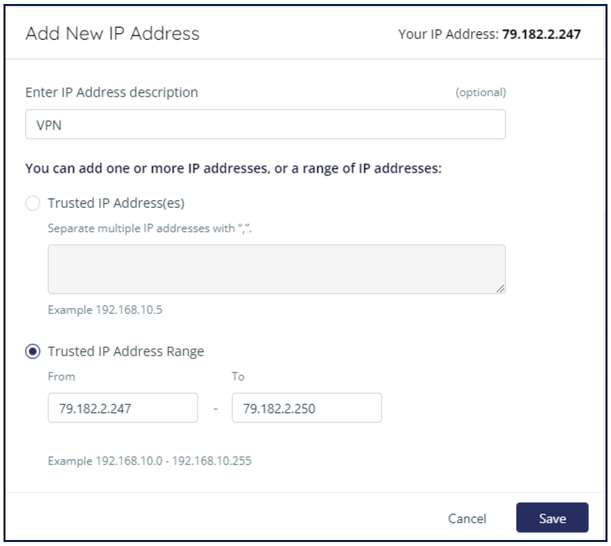
1. In the *Settings* panel, click **Security**, and then **IP Restrictions**.



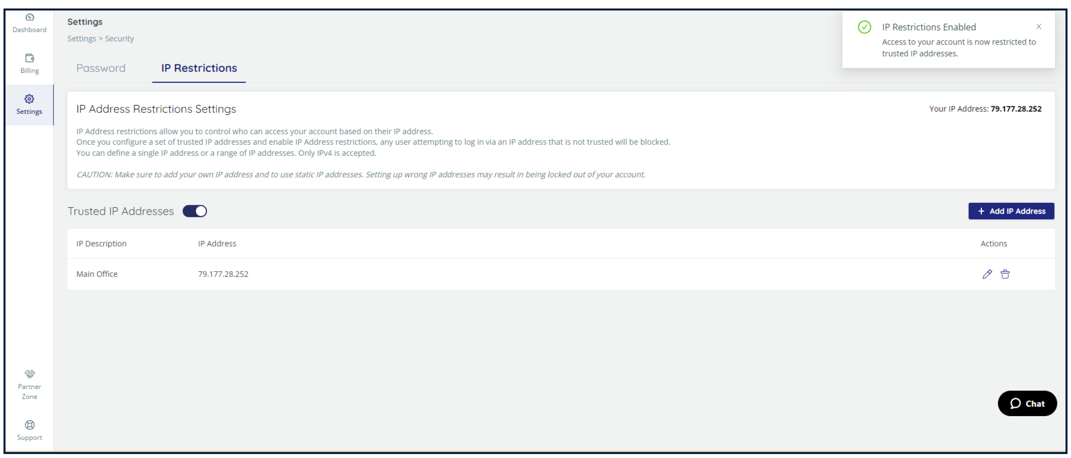
2. Click **+ Add IP Address.**
3. Enter one or more IP addresses:

    a. Enter individual addresses separated by commas, and an optional description.

    b. Or, enter a range of contiguous addresses, and an optional description.



4. Once you enter at least one address, the **Trusted IP Addresses** toggle will be turned on. You can always return to disable IP restrictions later on.



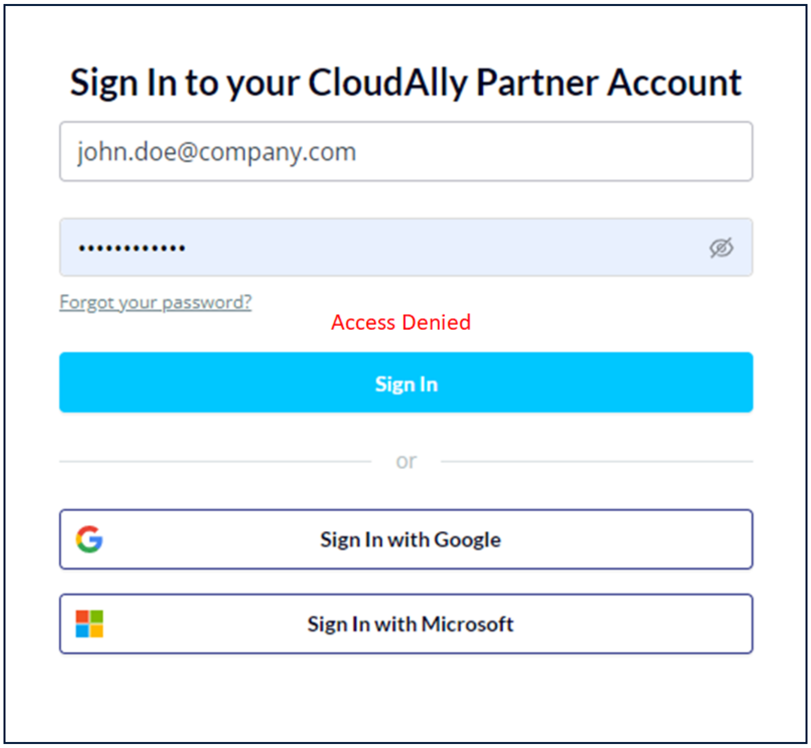
You can edit your list of addresses by clicking , or delete ones that you no longer want on your trusted list by clicking .

> **Note:** If you forget to include your own IP address on the trusted list, IP restrictions cannot be enabled.

Your account is now protected from access by users who are not on your list.

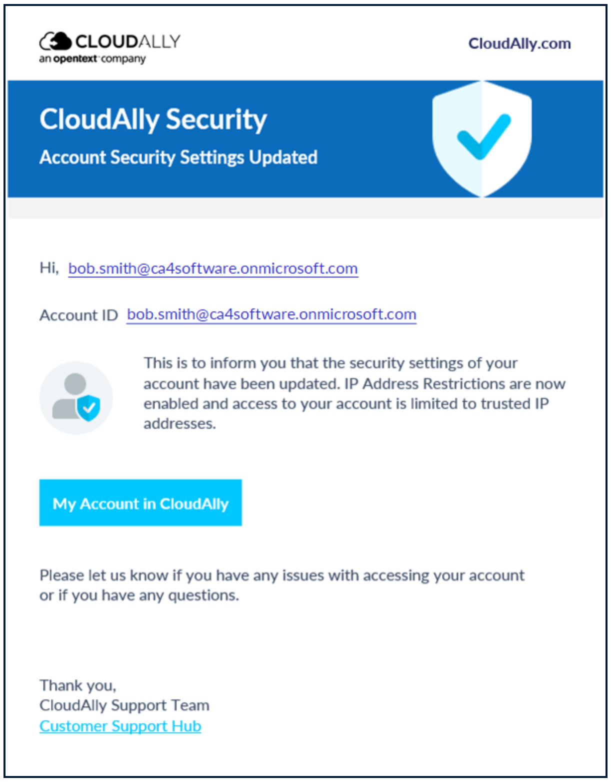
Blocking Access

If a user tries to access your account from an untrusted IP address, the following "access denied" error message will appear:



5.3.4 Email Notifications

Whenever you enable or disable IP restrictions, or modify the addresses, CloudAlly will send you an email notification, letting you know what has changed. It is also logged in the Security Audit. (See "Security Audit".)



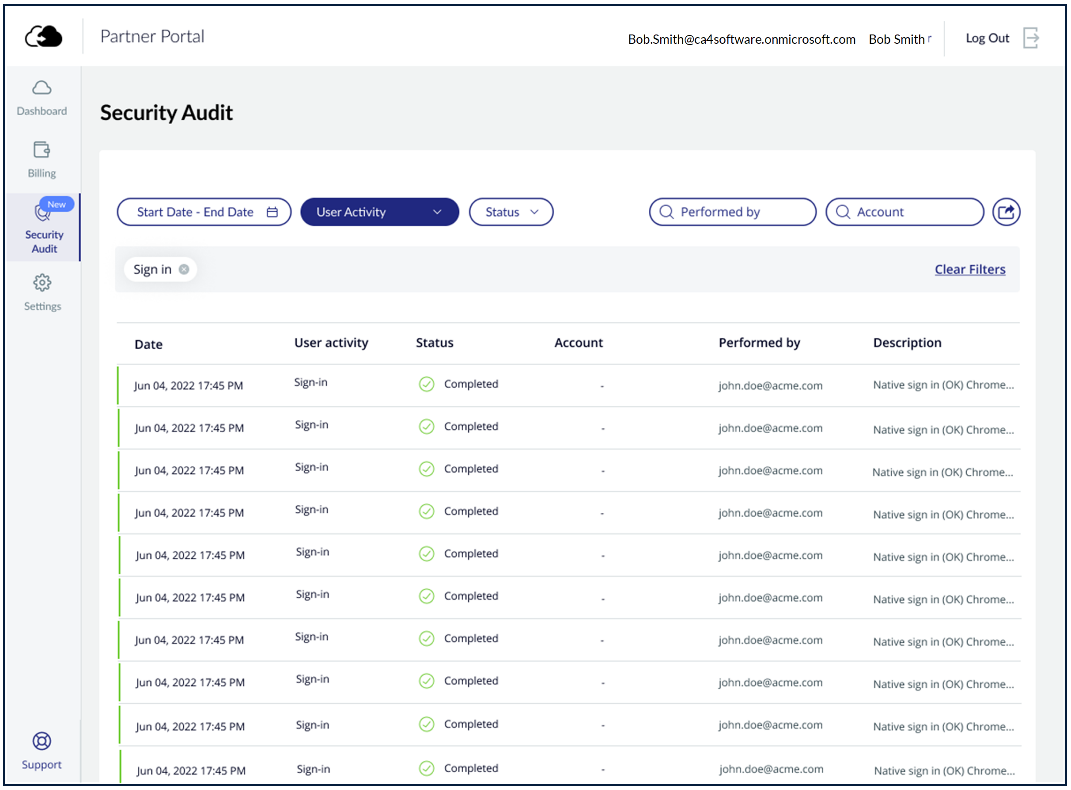
5.4 Security Audit

The *Security Audit* page provides a history of all the security-related actions that were performed by your account users. The user activity that is displayed includes:

- Sign-in
- Settings changed
- Notification

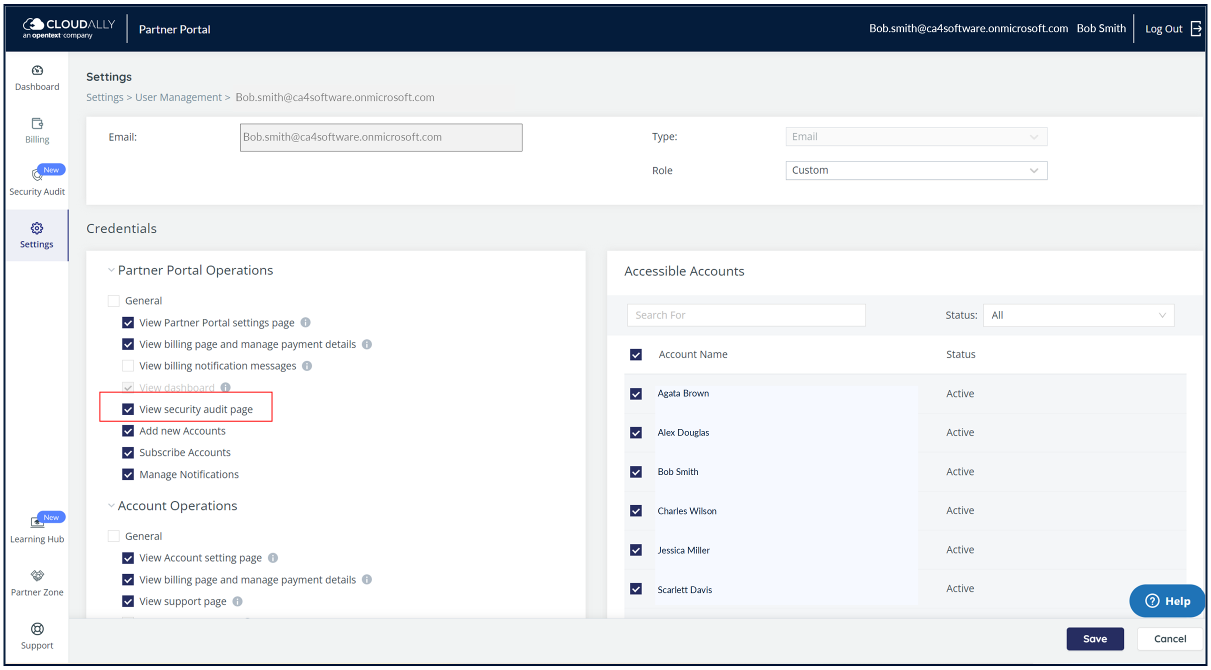
The page includes the date of the event, the type of activity, the status of the activity, and the user performing the activity. You can filter the actions by activity type, status, and user performing the activity.

The Security audit table can be exported as a CSV file by clicking **Export**



5.4.1 Setting Security Audit Permissions

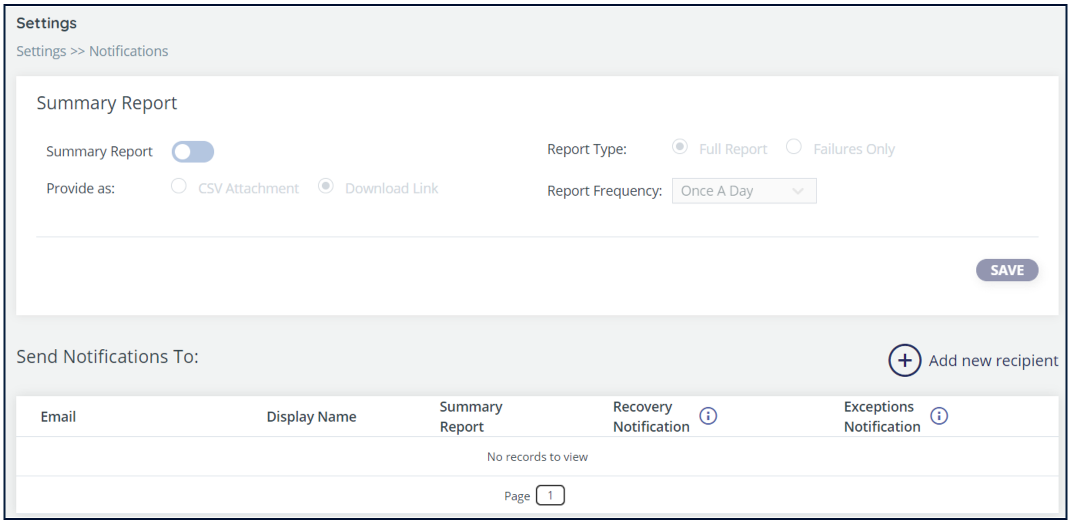
You can restrict access to the Security Audit page by removing the checkmark from the *View Security Audit* option for a particular user on the User Management page.



5.5 Notifications

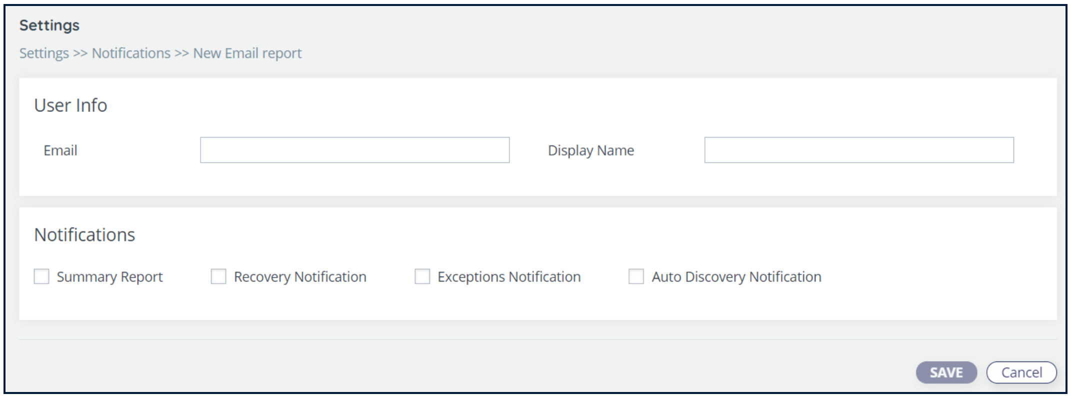
This page provides a set of tools for control over the flow of the notifications including the backup summary report, restore and export recovery notifications, and backup exception notifications. You can control the general settings of the notification, such as the frequency of reports (daily, weekly or monthly), the reporting type (full report or exceptions only), and whether the CSV backup detail report is included as an attachment or provided via a link in the email.

This page displays the summary of all recipients' notification settings and allows you to add new recipients or edit existing recipients as needed.



Setting up a new recipient is simple:

1. Click **+ Add new recipient.**
2. Enter the Email of the recipient and the Display name. The Display name is used in the report email to address the recipient.
3. Select the required notification types.
4. Click **SAVE**.



To edit an existing recipient's notifications settings, click on the icon to the right of the recipient you wish to edit.

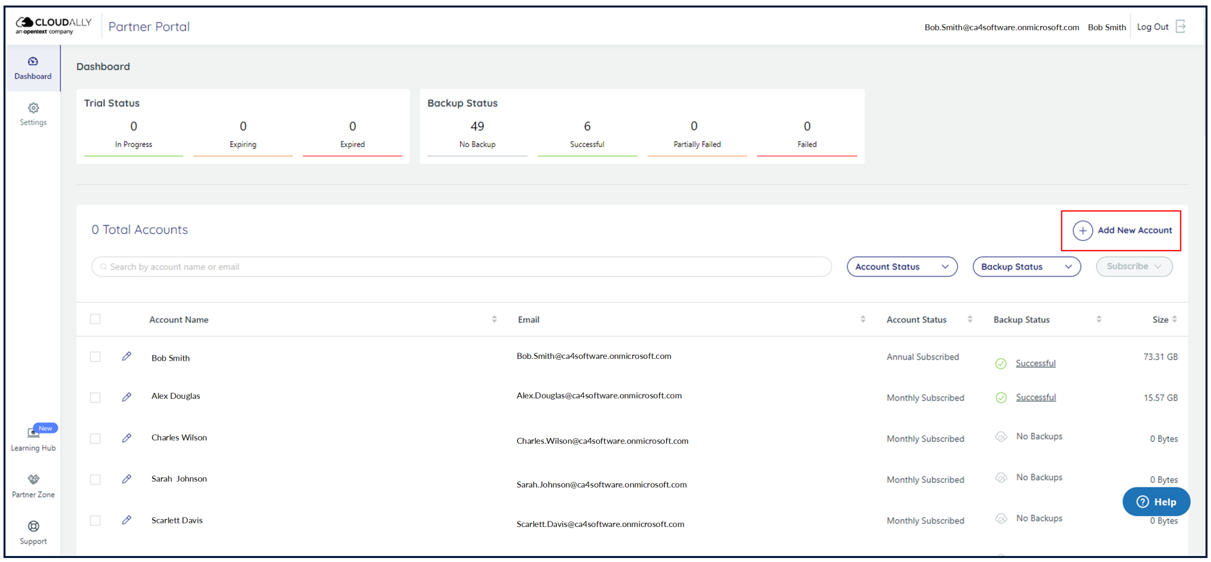
6 Adding a New Account

From the Partner Portal dashboard, you can create a new account for each customer using a unique email ID.

> **IMPORTANT!** It is recommended that an email address that does not send email to the customer be used. It is also recommended that aliases be used over shared email addresses. Theses email addresses cannot be reused within the CloudAlly partner portal for multiple customers - each must be unique.

6.1 Adding a New Customer Account

From the Partner Dashboard, click **+ Add New Account**.

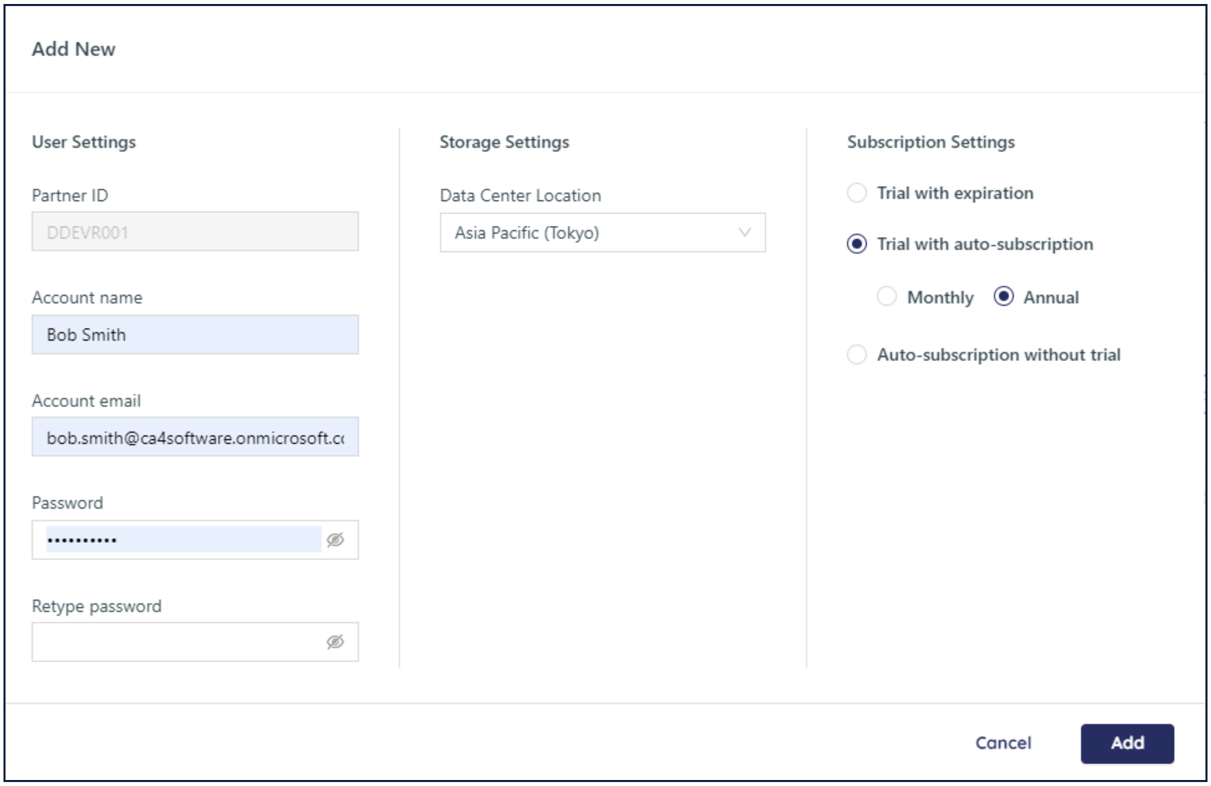


This will take you to the *Add New* settings screen.

6.1.1 User Settings

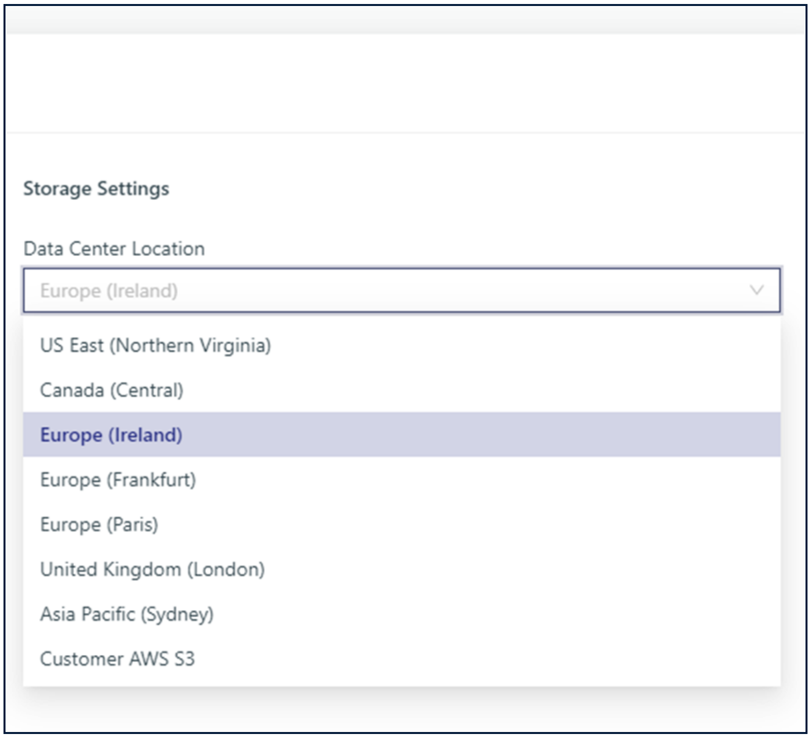
Complete the following fields about your new user:

- Account Name
- Account email
- Password



6.1.2 Storage Settings

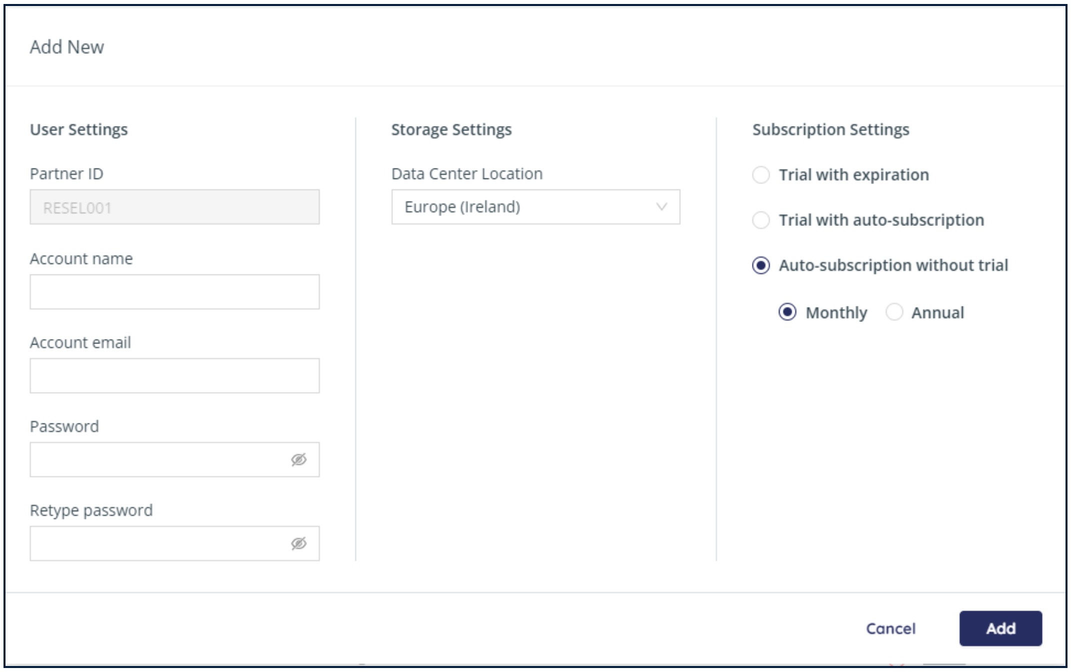
Select the Data Center Location. If you chose to store the customer's data in one of the custom storage options (Customer AWS S3, AWS S3 Compatible, Google Cloud, or Azure), you will be asked to provide the credentials for the connection.



6.1.3 Subscription Settings

After the 14-day trial period, users are granted a 7-day grace period to subscribe, after which time their backed up data will be deleted. After receiving requests from Partners whose users didn't realize that they needed to actively subscribe in order to preserve their data, CloudAlly now presents three subscription type options.

1. Trial for 14 days, with an expiration after the trial.
2. Trial for 14 days, with auto-subscription after the trial. There are two billing methods:
    a. Monthly
    b. Annually
3. No trial period - auto-subscription directly. There are two billing methods:
    a. Monthly
    b. Annually



2. Click **Add** to complete the new trial account setup.

A new account has been created, and the account will be added to your dashboard.

6.2 Activating Backups for New Direct Accounts

The next step in setting up your new direct account is to activate their backups.

To activate backups:

1. From the Partner Portal Dashboard, click the **Account Name**.
2. You will be logged in to the user's account. Click **+ Add Backup Task**.
   a. See the CloudAlly User Guides for instructions per service for how to add a new backup task. After you add the task(s), then you will need to select them and Activate them.
   b. You can also add a customer admin if needed to the account at that time via the User Management function, including the ability to manage permissions and remove the billing summary screen from their view.

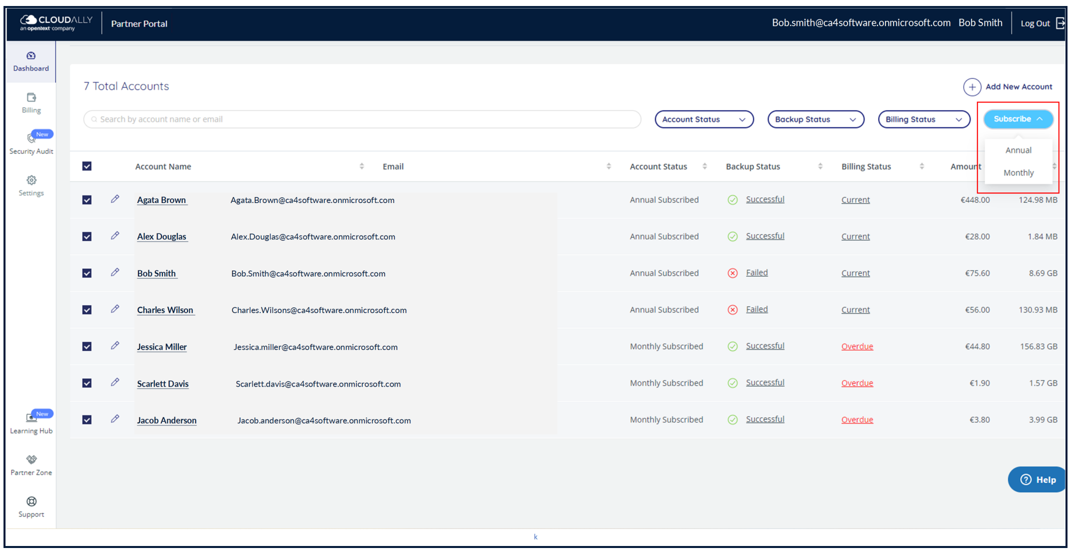
6.3 Subscribing a Trial Account

Trial accounts must be subscribed before the end of the 14-day free trial period. Accounts can be subscribed:

- **Monthly**: By either consolidated invoice or consolidated automatic credit/debit card charge, depending on which billing method you selected when you first set up the partner portal.
- **Annually** by invoice (per account) due in 30 days and payable by credit/debit card or PayPal.

Invoices over $1,000 USD can also be paid by international bank transfer if needed.

You can subscribe to all your trial accounts directly from the Dashboard by clicking **Subscribe > Annual** or **Subscribe > Monthly**:



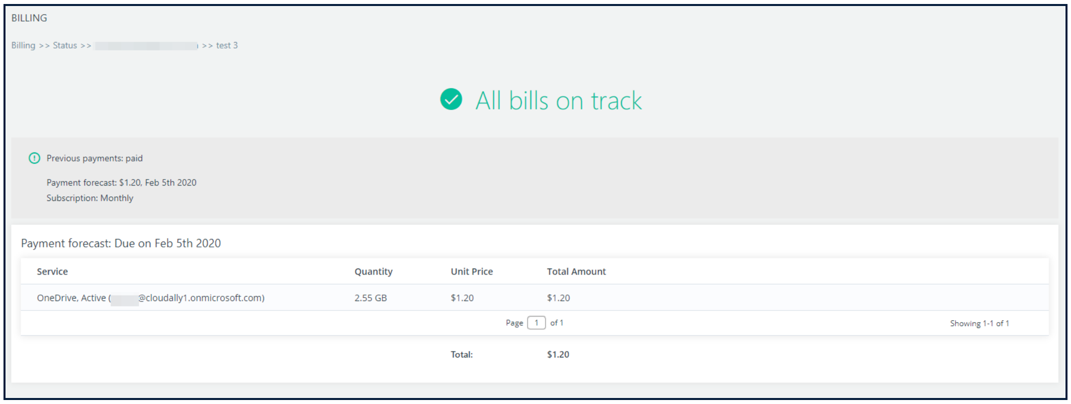
Only the trial accounts will be affected by this action. The accounts that are already subscribed with another type of subscription remain as they are.

6.4 Managing Your Subscriptions

You can check the current billing status of each account directly from the *Billing Status* screen, as well as review the individual billing amounts, next payment forecast, and next payment due date.

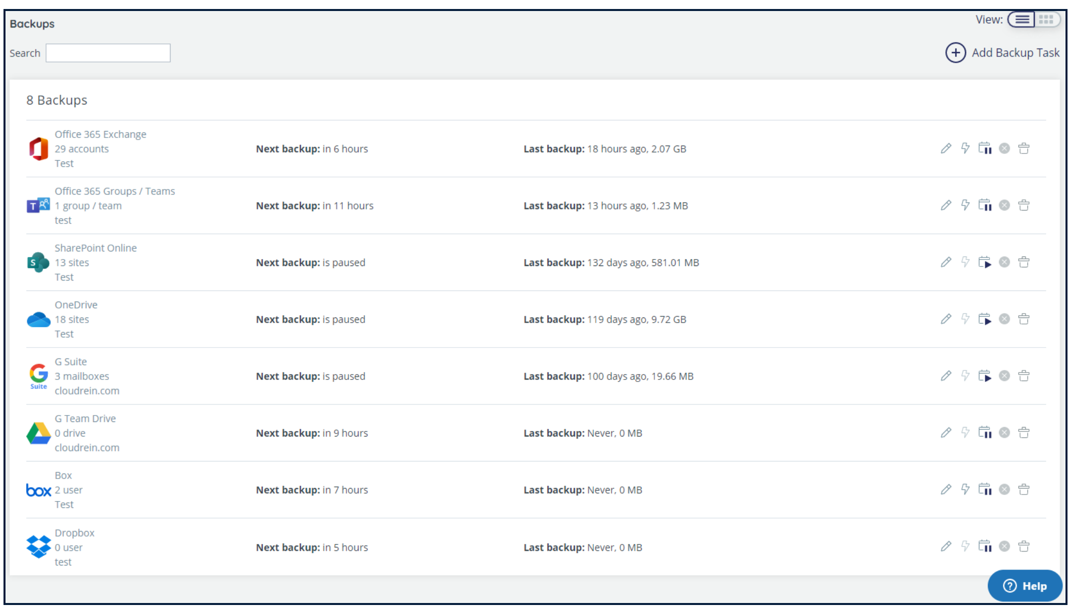
To review the billing status, select **Billing > Status.** The status screen displays each account, the billing status (Current, Due, Past Due, Trial, etc.), and the total billing amount.

Click the account name to drill down to the account level for a detailed view of the billing information.

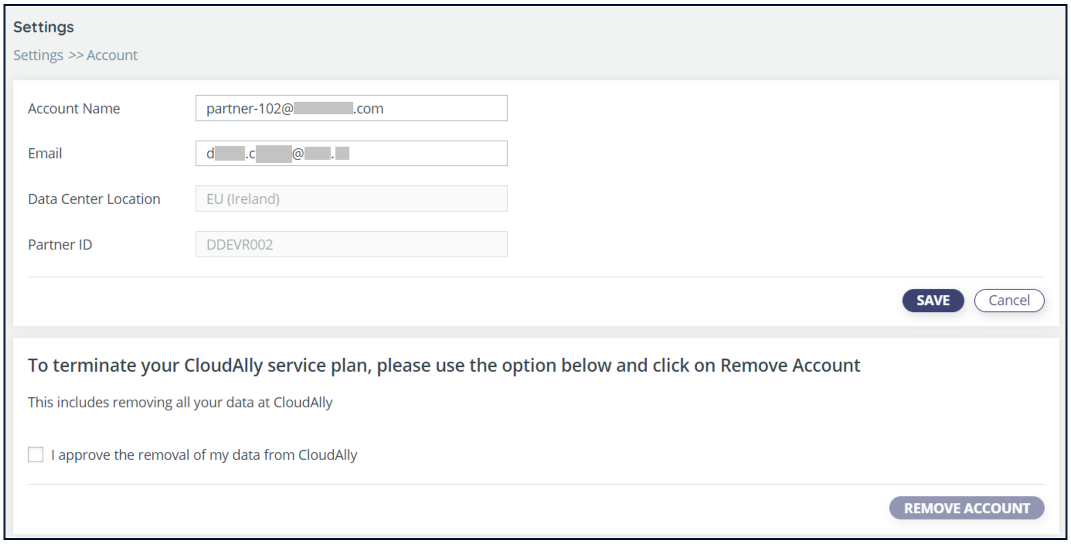


6.4.1 Canceling a User's Subscription

To cancel a user's subscription, drill down into the customer's account from the Dashboard. You should see the customer's portal:



Go to Settings >> Account, check the box "I approve the removal of my data from CloudAlly" and click **REMOVE ACCOUNT**:



IMPORTANT! All data of the removed account will be deleted.

6.4.2 Changing Subscription Type

Contact support if you wish to change your default billing method (credit card or invoice), or if you wish to change a customer's account from monthly to annual or vice versa.

7 Helpful Resources

7.1 About CloudAlly

Founded in 2011 as one of the world's first cloud-to-cloud backup services for Google Apps and Salesforce, CloudAlly led the industry with the first commercially available Microsoft cloud backup in Q1 2014. ISO 27001 and HIPAA certified CloudAlly adheres to industry-standard best practices for information security management, including EU-GDPR compliance.

7.2 Knowledge Base

Search through articles in our Knowledge Base at https://support.cloudally.com to find answers to the most common user questions.

7.3 Support

Support - If you have any question or need further help, do not hesitate to contact us via email at support@cloudally.com. or visit our customer support hub: https://support.cloudally.com

7.4 Privacy

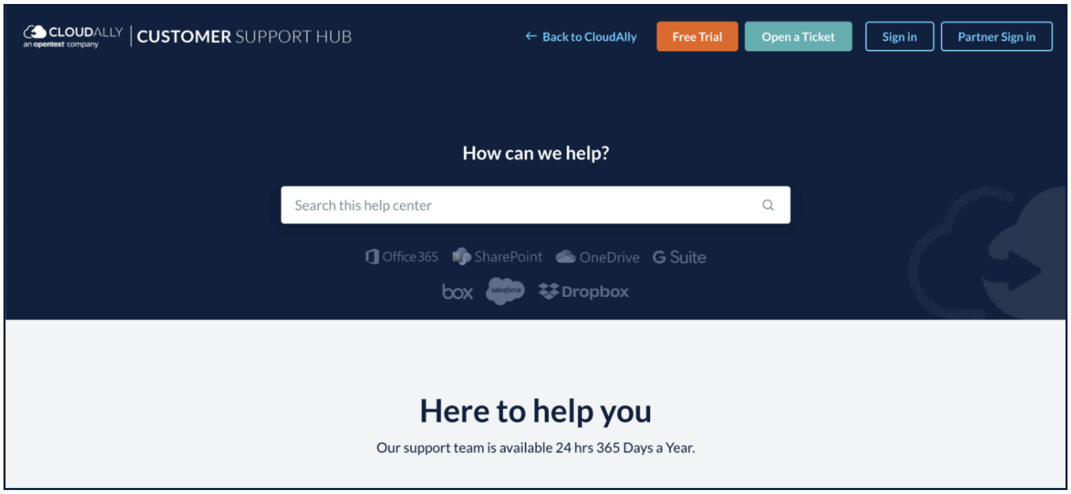
CloudAlly takes privacy seriously. Read our Privacy Policy at https://www.cloudally.com/privacy-policy

7.5 Security

CloudAlly provides a secure online backup solution with internationally recognized accreditation for information security management. Read how we protect your data at https://www.cloudally.com/resources/secure-saas-backup/

8 Support Pages

The Support option at the bottom of the Navigation Panel redirects you to our support hub. In the support hub, you can find articles covering some of the most common questions and providing instructions.



CloudAlly provides multi-channel support options:
